Can you use the Bissell ProHeat 2X as just a vacuum? No it can not be used as a vacuum cleaner., it is a carpet cleaner, to be used as cleaning Did you read your instructions?

Why is my carpet still wet after Bissell? BISSELL Carpet Cleaners use powerful suction to remove most of the water from your carpets during the cleaning process, however the carpet will be damp afterwards. To reduce the time it takes for the carpet to dry, open as many windows and doors as possible to allow air to flow through the room.

Why is my Bissell proheat cleaning solution not coming out? There may be build up at the spray tip. Use a paper clip to run through the spray tip so that any debris is pushed out. Rinse before replacing on the machine. The internal hose may be kinked, which will block the spray.

Why is liquid not coming out of my carpet cleaner? Another cause of reduced or no spray may be because the tank is not properly seated. If you still have reduced or no spray it might mean the pump has lost its prime. To fix this, turn the power off and then back on. Wait for one minute, then depress the trigger.

Why is there no water coming out of my Bissell Proheat 2X? The most common reason they won't spray the solution is due to the heater being plugged. There is also a chance the pump belt is bad or you could have a bad pump. Check the belt first. Generally, Proheat models have two belts a toothed belt that turns the brush roll, and a flat belt that turns the pump.

How do I get my Bissell carpet cleaner to spray?

Why is water not going through my Bissell carpet cleaner? You should check the water level and the formula level in both tanks and make sure they are securely attached to the machine. You should also check the caps and the gaskets on both tanks for any damage or debris, and clean them if necessary.
