1. Question: Explain the concept of elasticity of demand. What are the factors that can affect it? **Answer:** Elasticity of demand measures the responsiveness of quantity demanded to changes in price. It is calculated as the percentage change in quantity demanded divided by the percentage change in price. Factors affecting elasticity include the availability of substitutes, the importance of the good in consumers' budgets, and the time horizon.

2. Question: Distinguish between perfect competition and monopolistic competition. **Answer:** Perfect competition is characterized by a large number of firms producing identical products, with easy entry and exit into the market. Monopolistic competition is similar to perfect competition, but firms differentiate their products, creating some monopoly power.

3. Question: Explain the concept of market equilibrium and how it is achieved. **Answer:** Market equilibrium is the point where the quantity supplied equals the quantity demanded. It is determined by the interaction of supply and demand forces. In a perfectly competitive market, equilibrium is reached when the price adjusts to balance the quantity supplied with the quantity demanded.

4. Question: Discuss the role of government intervention in the market. What are the potential benefits and drawbacks? **Answer:** Government intervention in the market can take various forms, such as price controls, subsidies, and taxes. Potential benefits include correcting market failures, promoting social welfare, and protecting consumers. However, intervention can also lead to inefficiencies, rent-

seeking, and distortions in the allocation of resources.

5. Question: Explain the concept of externalities and how they can be addressed.

Answer: Externalities are spillover effects from one party's actions that affect another party without being captured in the market price. Positive externalities lead to underprovision, while negative externalities lead to overprovision. Governments can address externalities through taxes and subsidies, property rights, and regulation.
