Chapter 7 is considered a liquidation bankruptcy: it doesn't require a repayment plan but the business has to sell some assets to pay creditors. Chapter 11 is considered a reorganization bankruptcy that allows businesses to maintain their operations while creating a plan to repay creditors.

Do vendors get paid in Chapter 11? Your unsecured creditors are your bondholders, vendors, and suppliers. This group will get paid second. Keep in mind that not all your creditors will necessarily recover 100% of what they're owed. This may lead to damaged relationships with vital vendors and should be taken into consideration.

How often is Chapter 11 successful? In some cases. But don't get your hopes up. Only about 10% of Chapter 11 filings result in success; far more often, they end up in Chapter 7 straight bankruptcy, in which the company closes and its assets are sold to pay back secured creditors.
