ZIMSEC O Level Integrated Science Question Papers: Sample Questions and Answers

Integrated Science is a challenging subject that combines three sciences - Biology, Chemistry, and Physics - into one cohesive subject. Students preparing for the ZIMSEC O Level Integrated Science exam will benefit from practicing with sample question papers. Here are some sample questions and answers to help you get started:

Question 1 (Biology)

What is the difference between a producer and a consumer?

Answer: A producer is an organism that makes its own food through photosynthesis or other means. A consumer is an organism that cannot make its own food and must consume other organisms to obtain energy.

Question 2 (Chemistry)

What is the difference between a metal and a non-metal?

Answer: Metals are typically shiny, solid, and good conductors of electricity and heat. Non-metals are typically dull, can be solid, liquid, or gas, and are poor conductors of electricity and heat.

Question 3 (Physics)

What is the relationship between force, mass, and acceleration?

Answer: Force (F) is directly proportional to mass (m) and acceleration (a). This relationship is expressed by the equation: $F = ma$.

Question 4 (Biology)

Describe the process of photosynthesis.

Answer: Photosynthesis is the process by which plants and other autotrophs use sunlight, water, and carbon dioxide to create glucose and oxygen.

Question 5 (Chemistry)

What is the pH of a solution with a hydroxide ion concentration of 0.0001 M?

Answer: $\text{pH} = -\log[\text{OH}^-] = -\log(0.0001) = 4$

By practicing with sample question papers, you can become more familiar with the format of the exam and the types of questions that you may encounter. This will increase your confidence and help you achieve your desired score.
