#### The Great Gatsby: Key Questions and Answers from Macmillan

**1. Who is Nick Carraway and what is his role in the story?** Answer: Nick Carraway is the narrator of The Great Gatsby. He is a young man from the Midwest who moves to New York City and becomes Gatsby's neighbor. Nick is a reliable and honest observer who provides the reader with an insider's view of Gatsby's world.

**2. What is the significance of the green light at the end of Daisy's dock?** Answer: The green light symbolizes Gatsby's hope and dream of winning back Daisy Buchanan, his former love. Gatsby gazes at the light every night, believing that it represents his past happiness and that he can somehow recreate it.

**3. Why does Gatsby create a false identity for himself?** Answer: Gatsby was born into poverty and changed his name and background to escape his humble beginnings. He believes that by creating a wealthy and glamorous image for himself, he can attract Daisy and make her forget her marriage to Tom Buchanan.

**4. What is the role of money in the novel?** Answer: Money plays a significant role in The Great Gatsby. It is a symbol of power, status, and happiness. Gatsby accumulates wealth as a means of impressing Daisy and proving himself worthy of her love. However, he ultimately discovers that money cannot buy true happiness or love.

**5. What is the tragic flaw in Gatsby's character?** Answer: Gatsby's tragic flaw is his inability to accept reality and his obsessive pursuit of a dream that is ultimately unattainable. He clings to the belief that he can recreate the past and win back

Daisy, despite the fact that she has changed and moved on with her life.

## **Television and Video Engineering Full Unit Notes**

**Question 1:** What is the basic principle of television? **Answer:** Television involves converting an electrical signal into visual images, transmitted over a distance, and displayed on a screen.

**Question 2:** Explain the concept of scanning in television. **Answer:** Scanning divides an image into a series of horizontal lines, each line scanned sequentially from left to right. The image is reconstructed on the display by using a cathode ray tube (CRT) that draws the lines in the same pattern.

**Question 3:** Discuss the role of different television standards. **Answer:** Television standards define the number of lines, frames per second, aspect ratio, and other parameters. Different standards exist for different countries and regions, such as NTSC, PAL, and SECAM.

**Question 4:** Describe the components of a video signal. **Answer:** A video signal consists of three components: luminance (brightness), chrominance (color), and synchronization pulses. The luminance signal carries the black-and-white information, while the chrominance signal adds color. Synchronization pulses ensure proper display of the image.

**Question 5:** What are some recent advancements in television technology? **Answer:** Recent advancements include:

- High-definition television (HDTV) and ultra-high-definition television (UHDTV) for higher image resolution
- Curved screens and OLED (organic light-emitting diode) displays for enhanced viewing experiences
- Smart TVs and streaming services for access to online content
- Artificial intelligence (AI) for content personalization and automatic upscaling
