What are the 4 C's of investing? To help with this conversation, I like to frame fund expenses in terms of what I call the Four C's of Investment Costs: Capacity, Craftsmanship, Complexity, and Contribution. Capacity: The amount of capital a strategy can prudently oversee without degrading its integrity is of paramount importance to its cost.

What are the factors that determine investment? Therefore investment is strongly influenced by interest rates. High interest rates make it more expensive to borrow.

High interest rates also give a better rate of return from keeping money in the bank. With higher interest rates, investment has a higher opportunity cost because you lose out the interest payments.

What are the top 5 sources of FDI? Mauritius (25%), Singapore (23%), USA (9%), Netherland (7%) and Japan (6%) emerge as top 5 countries for FDI equity inflows into India FY 2023-24.
