Self-Report of Reading Comprehension Strategies: What Are They?

Paragraph 1: Self-report of reading comprehension strategies refers to individuals' subjective reports of the cognitive and metacognitive processes they use to understand written text. These strategies encompass a range of techniques, from comprehension monitoring and inference making to summarizing and connecting ideas. Self-report measures provide valuable insights into readers' strategy use, helping researchers and educators understand how individuals approach reading comprehension.

Paragraph 2: Self-report data can be collected through various methods, such as surveys, questionnaires, and interviews. Participants are typically asked to rate their frequency or confidence in using specific strategies on a Likert scale or through open-ended questions. Examples of common self-report questions include: "How often do you check your understanding of the text?" or "To what extent do you connect new information to prior knowledge?"

Paragraph 3: Self-report measures have several advantages. They are relatively inexpensive and easy to administer, allowing researchers to gather data from a large sample of participants. Additionally, self-report data provide subjective insights into readers' mental processes, which may not be accessible through other assessment methods.

Paragraph 4: However, self-report data also have limitations. Responses may be biased by social desirability or self-presentation motivations, where individuals intentionally or unintentionally report using more effective strategies than they actually do. Moreover, self-report data may not accurately capture strategy use during actual reading tasks.

Paragraph 5: Despite these limitations, self-report of reading comprehension strategies remains a valuable tool for understanding readers' strategy use. By

combining self-report data with other assessment methods, researchers and educators can gain a more comprehensive view of individuals' cognitive processes and identify areas for improvement in reading comprehension instruction.
