ACSM certifications expire every three years and require continuing education to maintain.

What is ACSM in Exercise Science?

ACSM is a professional organization that promotes research and education in the field of sports medicine and exercise science.

Who Published the Physical Activity Guidelines for Americans?

U.S. Department of Health and Human Services

Who Made the Physical Activity Guidelines?

ACSM, along with the Centers for Disease Control and Prevention (CDC) and other organizations

Who Published the First Ever Science Based Physical Activity Guidelines for Americans?

ACSM

What is the ACSM Based On?

Scientific research and evidence-based practices

What is the most profitable crypto day trading strategy?

How do you Analyse crypto for day trading? Crypto day traders use various technical analysis tools, like chart patterns, trading signals and indicators to make informed decisions. Successful traders often limit losses by relying on disciplined risk management techniques, such as using proper position sizing and setting stop-loss orders.

What is scalping in crypto day trading strategies? Scalping trading strategies rely on low exposure as the time in the market for each trade is low, ranging from a few minutes to hours. The small trade duration reduces the risks arising from big market fluctuations. To be sure, scalping tends to capitalize on small movements, increasing the likelihood of profitability.

How do you use Bollinger bands for day trading crypto? This is, by far, the most simple strategy to trade cryptocurrencies using Bollinger bands. Considering that the lower band provides oversold levels and the upper band overbought ones, just buy when the market is near the lower band, or below it, and sell when the market price is near or above the upper bands.

What is the most profitable day trading strategy?

What is the best chart for day trading crypto? Candlestick charts are the most popular and widely used charts in cryptocurrency trading, likely as they provide the same information as bar charts but in a more easily understood format. Each candlestick represents a specific time period and shows the opening, closing, high and low prices.

What time frame should I use for day trading crypto? As a general rule, traders should use a ratio of 1:4 or 1:6, such as a 1-hour chart for entries and a 4-hour chart for spotting the trend. While it's possible to use more than two timeframes, the added complexity creates diminishing returns when it comes to realizing tangible benefits.

How to predict crypto pumps? Technical indicators such as moving averages, relative strength index (RSI), and volume analysis can give you insights into the price movements of a cryptocurrency. Look for abnormal patterns or anomalies that could indicate a pump and dump scheme in progress.

How to screen crypto for day trading? Crypto to consider for day trading Bitcoin is a cryptocurrency with genuine global appeal. It has the highest liquidity of all crypto assets and liquidity is one of the main factors to look for in a crypto to day trade. That's because liquid crypto markets make it easier to get your buy and sell orders filled.

What is the 1 minute scalping strategy? Understanding 1-Minute Scalping Traders using this approach rely on 1-minute charts to make quick, multiple trades throughout the trading session. The primary goal is to accumulate potential small gains that might add up to larger returns over time.

What is the greatest scalping strategy? Scalp trading using the RSI In the first example, the price is moving steadily higher, with the three moving averages broadly pointing higher. Dips in the trend are to be bought, so when the RSI drops to 30 and then moves above this line, a possible entry point is created.

What is the best indicator for day trading scalping?

How long should Bollinger Band be for day trading? Bollinger Bands typically use a 20-period moving average, where the "period" could be 5 minutes, an hour or a day.

Which indicator is best for Bollinger Bands? Another indicator used with Bollinger Bands is %b, which plots the stock's closing price as a percentage of the upper and lower bands. The upper band is identified as 1.0, the middle band 0.5 and the lower band zero. Thus, %b shows how close the stock's current price is to the bands.

Is Bollinger Bands good for day trading? As reliable indicators of volatility, Bollinger Bands can help day traders as well.

What is the 11am rule in trading? The 11 a.m. trading rule is a general guideline used by traders based on historical observations throughout trading history. It stipulates that if there has not been a trend reversal by 11 a.m. EST, the chance that an important reversal will occur becomes smaller during the rest of the trading day.

What is the 3-5-7 rule in trading? The 3-5-7 rule in trading is a risk management guideline that suggests limiting the amount of capital you put into any single trade. According to this rule, you should not risk more than 3% of your trading capital on any one trade, no more than 5% on any one sector, and no more than 7% on all trades combined.

What is the most successful day trading pattern? The best chart patterns for day trading include the triangle, flag, pennant, wedge, and bullish hammer chart patterns. How to find patterns in day trading? To identify chart patterns within the day, it is recommended to use timeframes up to one hour.

What is the best time frame for day trading crypto? Choosing the appropriate time frame in crypto trading dictates trend identification, entry/exit points, and risk management. Shorter time frames, like minutes or hours, suit day traders seeking quick gains, while longer time frames, such as daily or weekly, are preferred by investors for spotting long-term trends.

What indicator to use for crypto day trading? Fibonacci Retracement It is the best indicator for crypto trading trusted by experienced crypto traders as the Fibonacci Retracement levels are static and do not change like the moving average. The static nature allows the traders to anticipate and easily identify the support and resistance levels.

What chart do most day traders use? A particularly popular day trading chart is the ascending triangle, also known as the "bullish pennant" called. It is a strong signal for an upward price trend. In this pattern, the apex of the triangle runs upwards, so that one can also speak of an ascending trend line.

What is the 2 hour trading strategy? The two-hour-a-day trading plan involves executing transactions during the first and last hours of the trading day. Volume tends to jump during these two hours of the day. Setting limit orders allows you to profit from swings during these key trading hours.

Which crypto is most stable for day trading? Bitcoin (BTC) is the most well-known cryptocurrency, and it's no surprise that many crypto enthusiasts consider it to be the best crypto to day trade. As the first and largest cryptocurrency by market

capitalization, BTC is a staple in the crypto market and has shown resilience against market volatility over the years.

How do you successfully day trade crypto?

Which crypto is best for daily trading?

Which strategy is best for crypto trading?

What is the best crypto trading platform for day trading?

What is the most profitable crypto trade of all time? A wallet has conducted what is believed to be the biggest trade of all time performed by an individual: it bought \$8,000 of Shiba Inu (SHIB) last August, which is now worth \$5.7 billion. According to a tweet published by Morning Brew, the investment came from \$8,000 to \$5.7 billion in just 400 days.

Which crypto can give 1000x in 2024?

What is the best moving average for day trading crypto? Typically, traders use the 50-day SMA and the 200-day SMA for the Golden Cross strategy. However, you can adapt the time frames to suit your trading preferences. Conversely, the Death Cross is a bearish trading signal that occurs when a shorter-term moving average crosses below a longer-term moving average.

How much do crypto day traders make?

What is the best algorithm for crypto trading?

How to be a successful crypto day trader?

How to do technical analysis in cryptocurrency? Cryptocurrency technical analysis usually relies on charting patterns, statistical indicators, or both. The most commonly used charts are candlestick, bar, and line charts. Each can be created with similar data but presents the information in different and useful ways.

What is the best chart for day trading? For day trading, candlestick and bar charts are particularly useful due to their detailed price action representation. For long-term analysis, line charts offer a clear view of overall trends.

What is the best time chart for day trading crypto? Ultimately, some traders feel most at ease trading on shorter time frames like the 1-hour chart all the way to the 1 minute chart. The former is short, but not excessively so, and still allows traders time to assess the market and make judgments without feeling rushed.

What platform do most day traders use? The type of trading platform most folks use depends on the type of trader they are. While Interactive Brokers might be one of the best options for day traders, other types of traders may like the variety of Charles Schwab or the versatility of Fidelity. New traders may appreciate Ally Invest or SoFi Investing.

Who is the richest crypto day trader? Changpeng Zhao - @cz_binance (net worth of \$33 - \$56.3 billion)
