### Weygandt, Kimmel, Kieso Financial Accounting 7th Edition

**Question 1:** Describe the three main financial statements and their purposes.

**Answer:**

- **Balance Sheet (Statement of Financial Position):** Shows the company's financial health at a specific point in time. It lists assets, liabilities, and equity.
- **Income Statement (Statement of Comprehensive Income):** Reports the company's revenues, expenses, and net income over a specific period of time.
- **Statement of Cash Flows:** Shows how cash is being used in operating, investing, and financing activities.

**Question 2:** What is the accounting equation? Explain how it relates to the three financial statements.

**Answer:** The accounting equation is  $\text{Assets} = \text{Liabilities} + \text{Equity}$ . It shows that the total assets of a company are equal to its total liabilities plus its owner's equity. This equation is the foundation of accounting and is reflected in all three financial statements.

**Question 3:** What are the five elements of financial statements?

**Answer:**

1. Assets
2. Liabilities
3. Equity
4. Revenue
5. Expenses

**Question 4:** Explain the concept of going concern and how it affects financial accounting.

**Answer:** Going concern is the assumption that a company will continue to operate indefinitely. This assumption affects financial accounting because it allows companies to spread out expenses and depreciate assets over their expected useful lives. If going concern were not assumed, companies would have to record all expenses and losses immediately.

**Question 5:** What is the purpose of notes to financial statements?

**Answer:** Notes to financial statements provide additional information about the company's financial position and performance that cannot be presented in the main financial statements. They include details about accounting policies, assets, liabilities, etc. Notes are an integral part of the financial statements and help users understand the company's financial health.
