Wohlers Report 2016: Unraveling the Latest Industry Insights

Q: What key findings does the Wohlers Report 2016 present?

A: The report highlights a \$5.1 billion global additive manufacturing market in 2015, with an expected growth to \$21.2 billion by 2020. It also reveals a significant increase in material revenue, driven by expansions in the aerospace and medical sectors.

Q: How does the report assess the market size and growth potential?

A: Wohlers Report estimates that the total installed base of industrial-grade 3D printers reached 33,000 units in 2015. It forecasts that the market will expand rapidly, with a compound annual growth rate (CAGR) of 25.9% between 2015 and 2020.

Q: What are the key industry trends identified in the report?

A: The report emphasizes the growing adoption of additive manufacturing in various industries, particularly in medical, automotive, and aerospace. It also highlights the emergence of low-cost 3D printers and the increasing availability of materials.

Q: What challenges does the industry currently face?

A: The report acknowledges challenges such as high production costs, limited material properties, and the need for skilled workforce. It emphasizes that addressing these challenges is crucial for the industry's continued growth.

Q: What are the future prospects for additive manufacturing?

A: Wohlers Report anticipates a promising future for additive manufacturing. It predicts that the technology will continue to gain acceptance and become an integral part of product development and manufacturing processes. The report also highlights the potential for new applications, such as 3D printing of organs and tissues.
