4-1 Review: Reinforcement (Answer Key)

Question 1: What is reinforcement?

Answer: Reinforcement is any consequence that increases the likelihood of a behavior being repeated.

Question 2: What are the two types of reinforcement?

Answer: Positive reinforcement (adding something desirable) and negative reinforcement (removing something undesirable).

Question 3: When should positive reinforcement be used?

Answer: Positive reinforcement should be used to encourage desired behaviors, such as completing assignments or being polite.

Question 4: When should negative reinforcement be used?

Answer: Negative reinforcement should be used to discourage unwanted behaviors, such as talking out of turn or hitting others.

Question 5: What is the difference between punishment and reinforcement?

Answer: Punishment decreases the likelihood of a behavior being repeated, while reinforcement increases the likelihood of a behavior being repeated. Punishment involves giving something undesirable or taking away something desirable, while reinforcement involves giving something desirable or removing something undesirable.
