Why is E36 so special? Its competitive spirit on the track against some heavy hitters translated well to the road where its buttery smooth straight-six engine was

It is just a pleasure to stir up and down through the gears with the engine wizzing-away at high revs. Oh yea, and the fuel economy is great!

Is the 318i a good engine? Mind you, if you want your 3 Series as a sedan you can now only have it as a 318i (not counting the supercar-chasing M3). It's just as well that it has a brilliant engine, then. The 2.0-litre turbo packs a punch but is well-mannered about it, and is also ridiculously fuel efficient.

Which is better 318i or 320i? If we're talking about petrol 318i and 320i then there's not an enormous difference — it's the same 2.0-litre petrol engine, with either 130hp or 150hp on offer. The N52 replaced the BMW M54 and debuted on the E90 3 Series and E63 6 Series. The N52 was the first water-cooled engine to use magnesium/aluminium composite construction in the engine

block.

What is better, N52 or N53? N53 is an improvement of the N52 Naturally Aspirated (NA) engine mainly since it has gasoline direct injection technology and can burn stratified. N53 unlike its predecessor does not have Valvetronic due to space limitations in the cylinder head.

Is N53 same as N54? Since the N54 is based on the older BMW M54 engine, it has an aluminium engine block (instead of the magnesium alloy used by the N53), a displacement of 2,979 cc (181.8 cu in) and does not have valvetronic (variable valve lift). Turbocharging is a key difference between the N54 and BMW's previous straight-six engines.

Is N20 better than B48? Basically, I'd say B48 is definitely the one to go for a more quiet and smooth driving experience. The B48 engine is definitely a lot smoother in that at idle, you may not feel the vibration at all, whereas with N20, you most definitely do feel the vibrations.

Are B46 and B48 the same? B46 – Same or Different? You might be surprised, but the answer is: both. Is the S58 better than S55? Compared to the S55, the S58 has larger turbos, a lower compression ratio. that is more friendly with increased boost levels. and

improved fuel system. And a one piece crankub that doesn't explode.

Which engine is better, S55 or B58? As you can see, now the B58 is really getting somewhere. It is making significantly more power than the S55 right up to 5800RPM, and over 100HP extra at 2500RPM. The only point at which the S55 is now beating the B58 is in a narrow band between 6000 and 6600RPM, and still only by a maximum of 17hp.
