**Apakah aki kering perlu di charge?** Jenis aki kering tidak memerlukan pengisian aki, karena daya listrik yang dihasilkan bersumber dari gel elektrolit yang terdapat di dalam separator. Inilah yang membuat aki kering tidak perlu lagi diisi oleh air aki.

**Berapa harga charger aki motor?**

**Berapa volt aki harus di cas?** Untuk mengetahui pengisiannya normal atau tidak, nyalakan mesin dan lampu utama. Tahan putaran mesin antara 4.000 – 5.000 rpm atau sekitar  $\frac{1}{4}$  putaran gas. Pengisian normal tegangannya antara 14 – 15 volt. Bila kurang dari 14 volt atau lebih dari 15 volt, berarti ada pengisian yang tidak normal.

**Berapa jam aki baru harus di cas?** "Aki baru ada baiknya dicas sebentar sekitar 10 menit dengan ukuran ampere yang sudah ditentukan," buka Heri. "Proses cas ini untuk mengembalikan arus listrik agar saat pertama kali digunakan bisa maksimal," jelasnya. Saat dicas maka elektrolit yang terdapat di aki akan optimal bekerja.

**Berapa volt aki yang masih baik?** Mengecek tegangan aki Pertama-tama, pastikan mobil dalam kondisi mati. Selanjutnya, hubungkan multimeter ke terminal positif dan negatif pada aki. Jika multimeter menunjukkan tegangan aki sekitar 12,6 hingga 12,8 volt, tandanya aki dalam kondisi baik.

**Berapa ampere pada aki 12 volt?** Setiap produsen motor pastinya telah melakukan perhitungan yang cermat, berapa kebutuhan listrik motor yang pas, sehingga pemilihan aki memang harus disesuaikan. Umumnya aki motor bertegangan 12 V, dengan kapasitas antara 3 Ampere hingga 7 Ampere.

**Aki 11 volt apakah normal?** “Voltase aki mobil dalam kondisi normal harus ada di 12 hingga 12,5 volt, ketika mesin dinyalakan minimal harus di 11,5 volt,” jelas Andi pegawai dari Sumber Battery, Cibinong. Saat mesin sedang menyala berarti aki dalam kondisi pengisian dengan angka voltase 13 sampai 14 volt.

**Berapa lama memanaskan mobil agar aki terisi?** Mobil yang tidak pernah dipanasi akan memberi dampak pada kondisi aki. Aki akan menjadi cepat tekor dan soak. Oleh karena itu, biasakan untuk memanaskan mesin mobil setiap hari setidaknya selama 5 hingga 10 menit.

**Berapa ampere aki 12 volt?** Setiap produsen motor pastinya telah melakukan perhitungan yang cermat, berapa kebutuhan listrik motor yang pas, sehingga pemilihan aki memang harus disesuaikan. Umumnya aki motor bertegangan 12 V, dengan kapasitas antara 3 Ampere hingga 7 Ampere.

**Berapa lama daya tahan aki kering?** Aki jenis kering memiliki usia pemakaian sekitar 1-2 tahun. Hal tersebut berbeda dengan jenis aki basah. Aki basah membutuhkan perawatan rutin yang wajib Anda lakukan, yaitu mengganti cairan aki. Jika penggantian tersebut tidak dilakukan, maka akan berdampak pada kendaraan Anda yaitu kemogokan.

# Speech Acts: An Essay in the Philosophy of Language by John Rogers Searle

## Introduction

John Rogers Searle's seminal work, "Speech Acts: An Essay in the Philosophy of Language," explores the complex relationship between language and action. Searle introduces the concept of 'speech acts' to describe the ways in which language can do things in the world, beyond simply conveying information.

## What is a Speech Act?

According to Searle, a speech act is a linguistic act that has a three-part structure:

1. **Locutionary Act:** The utterance of a meaningful sentence.
2. **Illocutionary Act:** The communicative intention behind the utterance (e.g., promising, apologizing, ordering).
3. **Perlocutionary Act:** The effect the utterance has on the listener (e.g., persuading, intimidating, reassuring).

## Types of Speech Acts

Searle identifies five main categories of speech acts:

1. **Assertives:** Statements that commit the speaker to the truth of their content (e.g., "This is a pen").
2. **Directives:** Commands, requests, or suggestions that aim to influence the listener's actions (e.g., "Close the door").
3. **Commissives:** Statements that commit the speaker to future actions (e.g., "I promise to help you").
4. **Expressives:** Expressions of emotions or attitudes (e.g., "I am sorry").
5. **Declarations:** Utterances that bring about changes in the world (e.g., "I declare you husband and wife").

## Conditions for Success

For a speech act to be successful, Searle argues that certain conditions must be met:

1. **Preparatory Conditions:** The speaker must have the authority to perform the speech act and the listener must understand the meaning of the utterance.
2. **Propositional Content Conditions:** The content of the utterance must be true or at least acceptable to the listener.
3. **Sincerity Conditions:** The speaker must genuinely intend to perform the illocutionary act they express.
4. **Essential Conditions:** The illocutionary act must be performed according to the accepted rules of language and social conventions.

## **Conclusion**

Searle's theory of speech acts has had a profound impact on the philosophy of language. It has provided a framework for analyzing the complex ways in which language is used to communicate, influence, and transform the world around us. By recognizing that words can do things as well as describe things, Searle has expanded our understanding of the power and potential of human communication.
