The 2007 Ford Focus typically comes equipped with a four-speed automatic transmission or a five-speed manual transmission.

### Common Faults

Like any vehicle, the 2007 Ford Focus has some common faults to be aware of:

- **Transmission Jerking:** Transmission shuddering or hesitations can indicate problems with the clutches or torque converter.

### Resetting Procedures

2. Wait 5 minutes.
3. Reconnect the negative terminal.

#### Transmission Reset:

1. Start the engine and let it idle for 10 minutes.

2. Shift through all the gears, holding each for 5 seconds.
3. Turn the engine off and restart it.

## **Transmission Issues and Ford Focus Generations**

The 2007 Ford Focus belongs to the second generation of the Focus model. Transmission problems were prevalent in Ford Focus models from 2008 to 2011, known as the "bad transmission years."
