**Question:** What are the basic shapes used in woodturning? **Answer:** The most common shapes include bowls, vases, spindles, beads, and coves. Each shape requires specific techniques and tooling, making it essential to become familiar with their characteristics.

**Bowl Shapes** Bowls are perhaps the most iconic woodturning shape, ranging from shallow dishes to deep, ornate vessels. The shape is determined by the depth, diameter, and curvature of the bowl's interior and exterior. Bowl gouges and scrapers are commonly used to hollow out and refine these curves.

**Conclusion** Mastering the fundamental shapes in woodturning opens up a world of creative possibilities. From simple bowls to decorative spindles, understanding the

characteristics of each shape empowers woodturners to design and execute unique and captivating projects.
