They may also enact tax cuts to reduce taxes, which puts more money in consumers' pockets and stimulates spending.

What is an example of government spending to help stimulate the economy? Alternately, rather than lowering taxes, the government may seek economic expansion by increasing spending (without corresponding tax increases). Building more highways, for example, could increase employment, pushing up demand and growth.

What is an example of the government spending multiplier? Suppose the equilibrium level of GDP is \$700 billion. If government spending increases by \$50 billion, GDP rises from is \$700 billion (at Y0) to Y1 \$800 billion (at Y1). Thus, the change in GDP is $\$800 - \$700 = \$100$ billion.
