The Pentagon's New Map: A Q&A with Thomas P.M. Barnett

What is the Pentagon's New Map?

The Pentagon's New Map is a geopolitical model developed by Thomas P.M. Barnett, a former Pentagon advisor and author. The map divides the world into two main regions: the "Functioning Core" and the "Non-Integrating Gap."

What is the Functioning Core?

The Functioning Core includes the United States, Canada, Western Europe, Japan, Australia, and New Zealand. These countries have high levels of economic development, political stability, and global connectivity. They are also characterized by a strong military presence and a commitment to international cooperation.

What is the Non-Integrating Gap?

The Non-Integrating Gap refers to the areas of the world that are not part of the Functioning Core. These areas are characterized by economic stagnation, political instability, and a lack of global connectivity. They also have a high incidence of terrorism and other forms of violence.

Why is the Pentagon's New Map important?

The Pentagon's New Map is important because it provides a framework for understanding the global security landscape. The map helps policymakers identify areas of the world that are likely to be sources of conflict and instability. It also helps the United States prioritize its foreign policy goals and allocate its resources more effectively.

What are the implications of the Pentagon's New Map?

The Pentagon's New Map has several implications for U.S. policy. First, it suggests that the United States should focus on strengthening the Functioning Core while also working to prevent the Non-Integrating Gap from becoming even more unstable. Second, it suggests that the United States should develop a more comprehensive approach to dealing with terrorism and other threats that originate in the Non-Integrating Gap. Finally, it suggests that the United States should work more closely with its allies and partners to address these challenges.

What are business research methods? It is a systematic empirical investigation using statistical, mathematical, or computational techniques. Such methods usually start with data collection and then proceed to statistical analysis using various methods.
