**What is the difference between IP and MIL-STD-810G?** Whilst the STD-MIL-810 rating ensures durability against extreme shock and temperature, the IP68 rating ensures protection from small particles, especially dust and water, entering and compromising the device functionality.

**What is the difference between military grade and mil spec?** For our purposes, however, a military SPECIFICATION refers to a Department of Defense document that covers the physical properties of a component as well as how it operates. A military STANDARD refers to a Department of Defense document covering how a component is made and the materials that are used to manufacture it.

### **Socrates Quotes: Unveiling the Wisdom of the Athenian Philosopher**

Socrates, the renowned Athenian philosopher, left an enduring legacy of thought-provoking quotes that continue to inspire and challenge generations. His teachings on virtue, knowledge, and the examined life have shaped the course of Western

philosophy and continue to resonate today. Here are five questions and answers to explore some of Socrates' most famous quotes:

**1. "The unexamined life is not worth living."**

- This quote emphasizes the importance of self-reflection and introspection. Socrates believed that true happiness and fulfillment come from living a life that is constantly examined and evaluated. By questioning our beliefs, actions, and motives, we can gain a deeper understanding of ourselves and make choices that align with our values.

**2. "I know that I am intelligent because I know that I know nothing."**

- This quote highlights the Socratic paradox: the more we learn, the more we realize how much we don't know. True wisdom, according to Socrates, lies in acknowledging our ignorance and constantly striving for knowledge. This quote encourages us to remain humble and always seek to expand our understanding.

**3. "Virtue is knowledge."**

- For Socrates, virtue is not merely a set of rules or abstract ideals. It is a form of knowledge, acquired through reason and reflection. By understanding what is truly good and right, we will naturally act virtuously. This quote challenges the notion that morality is subjective and suggests that there is an objective foundation for ethical behavior.

**4. "An unexamined life is not worth living."**

- This quote underscores the importance of constantly questioning and evaluating our lives. According to Socrates, a life without self-examination is essentially a wasted life. By examining our thoughts, feelings, and actions, we can gain clarity and purpose, leading to a more fulfilling existence.

**5. "The only true wisdom is in knowing you know nothing."**

- This quote echoes the Socratic paradox, emphasizing the importance of humility and the constant pursuit of knowledge. Socrates believed that true

wisdom comes from recognizing our own limitations and constantly striving to expand our understanding. This quote encourages us to remain open-minded and eager to learn throughout our lives.

The wisdom of Socrates continues to inspire and guide people today, reminding us of the importance of self-reflection, the pursuit of knowledge, and the unwavering belief in the human capacity for reason and virtue.
