What's Happening to Ellie? A Book About Puberty for Girls and Young Women with Autism and Related Conditions

Puberty is a time of significant physical and emotional changes for all girls, but for girls with autism spectrum disorder (ASD) and related conditions, it can be particularly challenging. The book "What's Happening to Ellie?" provides a comprehensive and accessible guide to puberty for these young women.

1. What are the physical changes that happen during puberty?

During puberty, girls experience a surge in hormones that lead to a number of physical changes, including:

- Breast development
- Pubic hair growth
- Underarm hair growth
- Menstruation
- Changes in body shape

2. What are the emotional changes that happen during puberty?

Puberty is also a time of emotional changes, which can be especially pronounced in girls with ASD. These changes may include:

- Mood swings
- Increased anxiety
- Difficulty with social interactions
- Changes in sleep patterns
- Increased irritability

3. How can I prepare for puberty?

There are a number of things girls can do to prepare for puberty, including:

- Talking to a trusted adult about what to expect
- Reading books and articles about puberty
- Practicing good hygiene habits
- Getting regular exercise
- Eating a healthy diet

4. What is menstruation?

Menstruation is the shedding of the uterine lining, which occurs about once a month during puberty. It can be accompanied by a number of symptoms, including:

- Cramps
- Mood swings
- Fatigue
- Bloating
- Headache

5. How can I talk to my daughter about puberty?

Talking to your daughter about puberty can be challenging, but it is important to approach the conversation in a open and honest way. Here are some tips:

- Use simple and clear language
- Be patient and answer your daughter's questions

- Let your daughter know that you are there for her and that she can come to you with any questions or concerns

The Dorothy Day Story: A Profile of a Catholic Social Justice Activist

Who was Dorothy Day?

Dorothy Day (1897-1980) was an American journalist, social activist, and co-founder of the Catholic Worker Movement. She dedicated her life to serving the poor and marginalized, advocating for social justice and nonviolent resistance.

What was the Catholic Worker Movement?

The Catholic Worker Movement was a lay Catholic organization founded by Day and Peter Maurin in 1933 during the Great Depression. Its mission was to provide food, shelter, and other assistance to the poor and homeless. The movement emphasized the principles of voluntary poverty, hospitality, and the dignity of every human person.

What was Day's role in the Catholic Worker Movement?

Day played a pivotal role in the Catholic Worker Movement. She served as its editor for over four decades, writing articles that challenged societal injustice and promoted the Gospel message of love and compassion. She also established dozens of Catholic Worker houses across the United States, providing shelter and food to those in need.

What was Day's philosophy on nonviolent resistance?

Day was a staunch advocate for nonviolent resistance. She believed that violence only perpetuated violence and that love and understanding were the only true means of social change. She applied these principles in her activism, participating in protests and civil disobedience while always adhering to peaceful tactics.

What is Day's legacy?

Dorothy Day's legacy is one of compassion, service, and social activism. She remains an inspiration to many today, demonstrating the power of one person to make a difference in the world. Day was nominated for the Nobel Peace Prize in 1961.

WITH

1952 and later declared Servant of God by the Catholic Church, a step towards possible sainthood. The Catholic Worker Movement she co-founded continues to provide aid to the poor and marginalized, carrying on her mission of social justice and love.

Xam Idea Class 9 Science Term 1: Practice Questions and Answers

Paragraph 1 Question: Define matter. **Answer:** Matter is anything that has mass and occupies space.

Question: Name the three states of matter. **Answer:** Solid, liquid, and gas

Paragraph 2 Question: Explain the process of evaporation. **Answer:** Evaporation is the conversion of a liquid into a gas by absorbing heat.

Question: What are the three types of mixtures? **Answer:** Homogeneous, heterogeneous, and colloidal

Paragraph 3 Question: Define the term "atom." **Answer:** An atom is the smallest indivisible unit of matter that retains the chemical properties of an element.

Question: What is the nucleus of an atom? **Answer:** The nucleus is the central part of an atom that contains protons and neutrons.

Paragraph 4 Question: Describe the structure of an ionic bond. **Answer:** An ionic bond is formed between two ions with opposite charges. It is formed when one atom transfers electrons to another atom.

Question: What is the difference between a conductor and an insulator? **Answer:** A conductor allows electricity to flow through it easily, while an insulator does not.

Paragraph 5 Question: Explain the process of photosynthesis. **Answer:** Photosynthesis is the process by which plants use sunlight, carbon dioxide, and water to create glucose and oxygen.

Question: What are the functions of the stomata in a leaf? **Answer:** Stomata allow for the exchange of gases, such as carbon dioxide and oxygen, between the leaf and the atmosphere.
