Bersentuhan Kulit Demikian pula tidak batal wudhunya bila seorang laki-laki yang sudah baligh bersentuhan kulit dengan seorang perempuan yang belum baligh atau sebaliknya. Lalu bagaimana dengan wudhu sepasang suami istri yang bersentuhan kulit? Wudhu tersebut menjadi batal karena pasangan suami istri bukanlah mahram.

Apakah laki-laki bisa mengimami perempuan yang bukan mahram? “Makruh hukumnya jika seorang laki-laki salat bersama perempuan ajnabi (bukan mahram)

berdasarkan hadis Nabi Muhammad saw (janganlah laki-laki dan perempuan berkhawat karena yang ketiga adalah setan).

Teaching Atlas of Mammography: A Comprehensive Guide for Mammography Interpretation

What is the Teaching Atlas of Mammography?

The Teaching Atlas of Mammography is a comprehensive educational resource developed by the American College of Radiology (ACR) to assist radiologists in accurate interpretation of mammograms. It provides a systematic approach to evaluating mammographic findings, covering normal anatomy, common abnormalities, and interpretation techniques.

Why is the Teaching Atlas Valuable for Mammography Interpretation?

The Atlas offers several key benefits:

- **Comprehensive coverage:** It encompasses a wide range of mammographic findings, including benign, malignant, and atypia.
- **Standardized approach:** Provides a structured framework for reviewing and interpreting mammograms, ensuring consistent analysis and reducing subjectivity.
- **Expert guidance:** Written by leading radiologists with extensive experience in mammography interpretation, the Atlas offers reliable and authoritative insights.

How Can I Use the Teaching Atlas in Practice?

The Teaching Atlas is designed as a practical tool for daily use:

- **Reference guide:** Use it as a quick reference for specific findings or clarification of interpretation.
- **Educational resource:** Study the Atlas to enhance your understanding of mammographic anatomy and pathology.
- **Quality assurance:** Implement the standardized approach outlined in the Atlas to improve the accuracy of mammography interpretations.

Where Can I Access the Teaching Atlas?

The ACR Teaching Atlas of Mammography is available online and in print:

- **Online:** <https://www.acr.org/Clinical-Resources/Mammography-Atlas>
- **Print:** Purchase a copy from the ACR website or through a medical bookstore.

Conclusion

The Teaching Atlas of Mammography is an indispensable resource for radiologists specializing in mammography interpretation. Its comprehensive coverage, standardized approach, and expert guidance empower radiologists to confidently and accurately identify and interpret mammographic findings, contributing to timely and effective patient care.

Stuart Ira Fox Human Physiology 12th Edition

Question 1: What are the major functions of the cardiovascular system?

The cardiovascular system is responsible for circulating blood throughout the body. It delivers oxygen and nutrients to tissues and removes waste products. It also helps regulate body temperature and pH.

Question 2: How does the heart pump blood?

The heart is a muscular organ that pumps blood through the body. It is divided into four chambers: two atria and two ventricles. The atria receive blood from the body, and the ventricles pump blood out to the body. The heart valves prevent blood from flowing backward.

Question 3: What are the different types of blood vessels?

The three main types of blood vessels are arteries, veins, and capillaries. Arteries carry blood away from the heart, veins carry blood back to the heart, and capillaries are the smallest blood vessels that allow for the exchange of oxygen and nutrients between the blood and tissues.

Question 4: How does the respiratory system work?

The respiratory system is responsible for bringing oxygen into the body and removing carbon dioxide. It consists of the lungs, airways, and diaphragm. The lungs are two large organs that fill with air when we breathe in. The airways are tubes that carry air to and from the lungs. The diaphragm is a muscle that helps to draw air into the lungs.

Question 5: What are the major functions of the endocrine system?

The endocrine system is responsible for regulating a variety of body functions, including growth, development, metabolism, and reproduction. It consists of glands that secrete hormones into the bloodstream. Hormones are chemical messengers that travel throughout the body and bind to receptors on target cells.
