20, 25, 30, 35, 40, 45, 50, 55, 60, 65

Find the median and mode of the data set.

Answer:

Median: 42.5 Mode: 50

3. Question:

A sample of 50 students was taken from a population of 1000 students. The sample mean was 75 and the sample standard deviation was 10. Calculate the 95% confidence interval for the population mean.

Answer:

(73.76, 76.24)

4. Question:

A hypothesis test is conducted to determine if the mean weight of a certain brand of apples is different from 100 grams. A sample of 25 apples is taken and the sample mean is found to be 95 grams with a sample standard deviation of 10 grams. Use a significance level of 0.05 to test the hypothesis.

Answer:

The null hypothesis is rejected, as the p-value is less than 0.05.

5. Question:

A regression analysis is conducted to predict the sales of a new product. The independent variable is the advertising expenditure and the dependent variable is the sales in units. The regression equation is:

$$\text{Sales} = 50 + 2x$$

Where x is the advertising expenditure in thousands of dollars. Interpret the slope of the regression line.

Answer:

The slope of the regression line indicates that for every additional thousand dollars spent on advertising, the sales increase by 2 units.

The Five Rules for Successful Stock Investing

Investing in stocks can be a rewarding way to grow your wealth, but it's important to approach it with a sound strategy. Here are five essential rules to follow for successful stock investing:**

1. Know Your Risk Tolerance

Before you start investing, it's crucial to determine your risk tolerance. How much volatility can you handle in your portfolio? This will help you choose investments that align with your financial goals and emotional comfort level.

2. Diversify Your Portfolio

Don't put all your eggs in one basket. Diversify your portfolio by investing in a mix of stocks from different sectors, industries, and asset classes. This spreads your risk and reduces the impact of adverse market conditions on any single investment.

3. Invest for the Long Term

Stock markets fluctuate in the short term, but over the long term, they tend to trend upwards. Focus on investing for a minimum of five to ten years to ride out market ups and downs and maximize your potential returns.

4. Don't Follow the Herd

Avoid investing based on popular trends or hype. Do your own research and make informed decisions about the companies you invest in. Understand their business models, financial performance, and growth prospects.

5. Seek Professional Advice if Needed

If you're new to investing or have complex financial needs, consider consulting a financial advisor. They can provide guidance, help you create a personalized investment plan, and monitor your progress over time.
