You Can Make Anything Sad: An Interview with Spencer Madsen

"You Can Make Anything Sad" is a heartbreaking and thought-provoking memoir by Spencer Madsen. In it, he explores the complexities of grief, loss, and depression.

What inspired you to write "You Can Make Anything Sad"?

The death of my mother when I was 11 was the catalyst for the book. I didn't know how to process my grief at the time, and I didn't have the language to express it. I turned to writing as a way to cope, and the book grew out of that.

The book is a very personal look at grief and depression. Was it difficult to write?

It was definitely difficult at times. I had to revisit some painful memories and emotions, but I also found it to be a cathartic experience. Writing the book helped me to understand my own grief and depression better, and it gave me a way to share my story with others who might be going through similar experiences.

How do you hope your book will help others?

I hope that my book will help others to feel less alone in their grief and depression. I want them to know that they are not alone, and that there is hope. I also hope that my book will help to break down the stigma surrounding mental illness.

What advice would you give to someone who is struggling with grief or depression?

My advice would be to seek professional help. A therapist can help you to process your emotions and develop coping mechanisms. I would also encourage people to talk to their friends and family about what they are going through. Sharing your story can be a powerful way to heal.

Finally, what is the most important lesson you have learned from your experiences with grief and depression?

The most important lesson I have learned is that it is possible to heal and move on from grief and depression. It takes time and effort, but it is possible. I hope that my book will help others to find hope and healing on their own journey.
