Why don't carrots and sticks work? Carrots and Sticks Don't Work decries motivation based around financial incentives, considering these programs brittle and temporary. Instead, author Marciano suggests that people are most motivated when they feel respected by their organization and feel respect for their work.

What is the carrot stick theory? Carrot and stick motivation is a motivational approach that involves offering a “carrot” (a reward—for good behavior) and a “stick” (a negative consequence for poor behavior). It motivates staff by creating actionable goals and desirable rewards for employees who can alter their behavior and performance.

Is carrot-and-stick approach good or bad? Most often, positive reinforcements or providing carrots are more effective in incentivizing people to do things than threatening with punishments. While it is possible to induce a desired behavior in people using a carrot-or-stick approach and it works for simple tasks, it is not ideal for complex tasks.
