### **Torque Limiters: AutoGard for Automated Safety**

**What is a torque limiter?** A torque limiter is a device that automatically detects and disengages a drive shaft when it senses a predetermined torque level. This prevents damage to equipment and potential injuries by limiting the amount of force transmitted through the shaft.

**How does the AutoGard torque limiter work?** The AutoGard torque limiter utilizes a friction-based mechanism. When torque exceeds a set point, a friction disc slips, disengaging the shaft. The amount of torque at which the disc slips is adjustable, allowing for customization based on specific application requirements.

**What are the advantages of using an AutoGard torque limiter?** AutoGard torque limiters offer several advantages:

- **Automated safety:** Prevent overloads and protect equipment without the need for operator intervention.
- **Precise torque control:** Allow for fine-tuning of torque limits for optimal performance.
- **Reduced downtime:** Minimize equipment damage and downtime caused by overloads.
- **Increased operator safety:** Protect operators from the risks associated with excessive torque.

**Where are AutoGard torque limiters commonly used?** AutoGard torque limiters find applications in a wide range of industries, including:

- Industrial machinery: Protect gearboxes, drives, and other components from overloads.
- Automotive: Prevent damage to powertrains, CV joints, and axles.
- Aerospace: Ensure safety and prevent failures in critical components.

**How do I select the appropriate AutoGard torque limiter for my application?** To select the correct AutoGard torque limiter, consider the following factors:

- Torque range: Determine the maximum torque the shaft will experience.
- Shaft size: Choose a torque limiter with the appropriate bore size to fit the shaft.
- Duty cycle: Select a torque limiter rated for the expected operating conditions.
- Environmental factors: Consider the temperature, vibration, and other environmental conditions the torque limiter will encounter.
