another. The laws of thermodynamics only apply when a system is in equilibrium or moves from one equilibrium state to another.

What is the most important topics for thermodynamics? Important Topics of Thermodynamics First Law of Thermodynamics. Second Law of Thermodynamics. Third Law of Thermodynamics. Enthalpy and Enthalpy Change.

What are thermodynamics 3 examples? Some examples of thermodynamic systems are washing machines, refrigerators and air-conditioners. Air-conditioner is a closed system that circulates refrigerant inside the system, altering the pressure of the refrigerant at different points to promote the transfer of heat.
