**What are the economic ideas of Paul Krugman?** Paul Krugman instead claimed in his 1979 theory that economies of scale mean that world trade is dominated by similar countries producing similar products. Economies of scale and reduced transport costs also explain why an increasing proportion of people live and work in cities.

**What factors does Paul Krugman identify that supported the expansion of international trade in the 1800s?** Explanation. Paul Krugman has identified improvement in transportation as a factor that helped in the expansion of international trade.

**How can we justify international economics as a special branch of economics?** Answer and Explanation: International economics is a distinct branch within economics because it is extremely relevant to the contemporary, globalized economic system. While other branches of economics focus on individual or domestic levels, international economics analyzes on the international level.

**What is Krugman's theory?** This is the so-called theory of “comparative advantage.” Krugman showed that there is another reason that countries trade: to exploit economies of scale. Many goods and services are produced more cheaply if they are produced in large quantities.

**Is Paul Krugman liberal or conservative?** Political views. Krugman describes himself as liberal and has explained that he views the term "liberal" in the American context to mean "more or less what social democratic means in Europe".

**What did Paul Krugman believe about a country that attempts to use strategic trade policy?** Question: Paul Krugman believed that a country that attempts to use strategic trade policy to establish a domestic firm in a dominant position in a global industry, is most likely to Multiple Choice dominate the industry.

**What are the two main international trade theories?** The main historical theories are called classical and are from the perspective of a country, or country-based. By the mid-twentieth century, the theories began to shift to explain trade from a firm,

rather than a country, perspective. These theories are referred to as modern and are firm-based or company-based.

**Which theory best explains international trade?** Also called the Heckscher-Ohlin theory; the classical, country-based international theory states that countries would gain comparative advantage if they produced and exported goods that required resources or factors that they had in great supply and therefore were cheaper production factors.

**What are the principles of international economics?** The key principles underpinning the basics of international economics include: the law of comparative advantage, which explains the benefits of trade; the understanding of balance of payments and exchange rates; and the concept of trade protectionism, including tariffs and quotas.

**What is an example of international economics?**

**What is the purpose of international economics?** International economics deals with issues arising from economic interaction among sovereign nations; fields such as international trade, international financial flows, international aid and technical assistance for developing countries, international migration, and exchange rate regimes present international economic ...

**What is the assumption of Krugman model?** One of the typical explanations, given by Paul Krugman, depends on the assumption that all firms are symmetrical, meaning that they all have the same production coefficients. This is too strict as an assumption and deprived general applicability of Krugman's explanation.

**What is Krugman famous for?** As a researcher he invented the "new trade theory" and won the John Bates Clark Medal for the best American economist under 40. Krugman is well-known in academia for his work in international economics, including trade theory, economic geography, and international finance.

**What is Paul Krugman global strategic rivalry theory?** Global strategic rivalry theory emerged in the 1980s and was based on the work of economists Paul Krugman and Kelvin Lancaster. Their theory focused on MNCs and their efforts to gain a competitive advantage against other global firms in their industry.

**What is Krugmans' theory?** Krugman defined the New Economic Geography as the location theory of production, just as the concept of the classical location theory, which is proposed to explain the mechanism of formation and evolution of the economic spatial structure.

**Why did Paul Krugman win the Nobel Prize?** Paul Krugman (born February 28, 1953, Albany, New York, U.S.) is an American economist and journalist who received the 2008 Nobel Prize for Economics for his work in economic geography and in identifying international trade patterns. He is also known for his op-ed column in The New York Times.

**Where did Paul Krugman go to college?** Paul grew up on Long Island, earned his B.A. at Yale, and received his Ph. D. from the Massachusetts Institute of Technology in 1977. After teaching at Yale for three years, he returned to MIT, where he revolutionized the field of international trade theory.

**What were the economic ideas of the Industrial Revolution?** Capitalism was also a central component of classical liberalism in the societies of the Industrial Revolution. This ideology was based on economic individualism and the principles of economic freedom, private ownership, competition, self-interest, and self-reliance.

**What is the new economic geography theory of Krugman?** Krugman (1991) developed a theoretical model of endogenous industry location choice and demonstrated that under reasonable assumptions, a spatial distribution of economic activity with a core and periphery would develop; the process that Krugman first described would later be dubbed agglomeration.

**What is the economic idea of JM Keynes?** Keynes argued that inadequate overall demand could lead to prolonged periods of high unemployment. An economy's output of goods and services is the sum of four components: consumption, investment, government purchases, and net exports (the difference between what a country sells to and buys from foreign countries).

**What were the economic ideas of mercantilism?** Mercantilism is an economic theory that emphasizes self-sufficiency through a favorable balance of trade. Mercantilist policies focus on the accumulation of wealth and resources while

maintaining a positive trade balance with other countries.
