The Student Engagement in Schools Questionnaire (SESQ)

What is the SESQ?

The SESQ is a widely used survey instrument that measures student engagement in schools. It consists of 41 questions that assess students' perceptions of their school environment, their teachers, and their peers. The survey is designed to help schools identify areas where they can improve student engagement and create a more supportive learning environment.

What does the SESQ measure?

The SESQ measures four dimensions of student engagement:

- **Cognitive engagement:** The extent to which students are actively involved in their own learning.
- **Behavioral engagement:** The extent to which students participate in classroom activities and follow school rules.

- **Emotional engagement:** The extent to which students feel connected to their school and classmates.
- **Social engagement:** The extent to which students interact with their peers and participate in school activities.

How is the SESQ administered?

The SESQ is typically administered to students in grades 6-12. It can be administered online or in paper format. The survey takes approximately 20-30 minutes to complete.

How are the results used?

The results of the SESQ can be used to:

- Identify areas where students are struggling with engagement
- Develop strategies to improve student engagement
- Track progress in improving student engagement

What are some of the benefits of using the SESQ?

The SESQ is a valuable tool for schools that are looking to improve student engagement. The survey provides schools with data that can help them identify areas where they need to improve, and it can help schools track their progress in improving student engagement. The SESQ is also a relatively quick and easy survey to administer, making it a feasible option for schools with limited resources.
