

OCCUPATIONAL THERAPY IN COMMUNITY BASED PRACTICE SETTINGS

[Download Complete File](#)

What is an example of a community-based program in occupational therapy?

Examples include adult daycare programs, driving rehabilitation programs, and health promotion programs (Scaffa, 2001; McColl, 1998). According to Wittman and Velde (2001), community-based practice “refers to skilled services delivered by health practitioners using an interactive model with clients” (p. 3).

What is the role of OT in the community setting? Occupational therapy practitioners provide community-based services to people throughout the lifespan. This includes participation in programs and services that address prevention, as well as promotion of healthy occupations in the community.

What are three community settings in which occupational therapy (OT) practitioners may work? Occupational therapy services may be provided in a client's home, community settings (e.g., community centers, shelters, free clinics), hospitals, nursing homes, outpatient clinics, primary care offices, schools, and many other locations.
