The Post-Truth Era: Dishonesty and Deception in Contemporary Life

October 2004

By Ralph Keyes

Introduction

In his seminal work, "The Post-Truth Era," author Ralph Keyes explores the alarming rise of dishonesty and deception in modern society. Keyes argues that we are entering an era where truth no longer holds sway and where unchecked falsehoods and distortions shape our perceptions and actions.

Q: What is the "post-truth era"?

A: The post-truth era is a time in which objective facts and evidence are less influential in shaping public opinion than appeals to emotion, personal beliefs, and partisan interests. This has led to a proliferation of misinformation and the erosion of

trust in institutions that were once seen as sources of reliable information.

Q: Why is dishonesty becoming more prevalent?

A: Keyes cites several factors that have contributed to the rise of dishonesty, including the rise of social media, where false information can spread rapidly and unchecked; the decline of traditional journalism, which once served as a watchdog against falsehoods; and the growing polarization of society, which makes it easier for people to dismiss information that contradicts their preexisting beliefs.

Q: What are the consequences of dishonesty?

A: Dishonesty has serious consequences for individuals, society, and democracy. It undermines trust, erodes confidence in public institutions, and hinders our ability to make informed decisions. It also creates a climate of suspicion and cynicism, making it difficult for us to engage in constructive dialogue and solve pressing problems.

Q: How can we combat dishonesty?

A: Keyes emphasizes the importance of promoting critical thinking skills, encouraging skepticism, and supporting independent journalism. He also calls for a return to a shared commitment to the truth and a willingness to engage in honest and respectful debate.

Conclusion

The post-truth era is a dangerous time for our society. Dishonesty and deception have become pervasive, undermining trust, eroding institutions, and making it difficult for us to make informed decisions. By promoting critical thinking, encouraging skepticism, and supporting independent journalism, we can combat dishonesty and restore a culture where truth and honesty prevail.
