How much oil does an ATV need? Note: For 110cc models add approximately 1/2 quart (500ml) oil and top off using dipstick as a guide when vehicle is flat. For 125cc models add approximately 3/4 quart (700ml) oil and top off using dipstick as guide when vehicle is flat.

Is 10W30 better than 10W40? Think of it this way: both oil grades are good for cold starts. But if you're in a warmer climate or the engine runs a little hotter, 10W40 is the way to go. If you live someplace colder or the engine runs cooler, the 10W30 works better since it runs a little thinner in cooler temperatures.

What happens if you put too much oil in a 350? When too much oil is added, the level in the oil pan becomes too high. That allows a fast-moving lobed rod called the crankshaft to come into contact with the oil and essentially aerate it. The result is a foamy, frothy substance that cannot properly lubricate the engine.

What is the difference between 10W30 and 5W30? The 10W30 designation on engine oil means that the viscosity of the oil is rated at 10W when an engine is cold, and 30 when the engine is hot. This is different than an oil labelled 5W30, which has

a thinner viscosity when the engine is cold at 5W.
