

ENGLISH LANGUAGE QUESTION AND ANSWER FOR WAEC 2017

Download Complete File

Is there an app for WAEC questions and answers? A free app for Android, by Scholarly Educational Software Ltd. WAEC - Past Questions and Answers is a learning app that will help you pass your exams with flying colors. The app has been developed to give candidates a fair and equal opportunity to prepare for the exams.

What app can I use to get answers?

Which app is best for exam answers?

Which website gives answers to questions? Some of the more popular question and answer platforms include Quora, Yahoo! Answers, and StackExchange.

Which app scans the question and gives the answer? Open the Socratic app. Tap Photo Camera . Take a picture of the question or explanation with your device's camera.

How to find any question answer? Ask a Q&A site or message board for basic questions or advice. If you have a simple question that could use a variety of perspectives, post it on a Q&A or message board. The website users can give advice as needed and point you in the right direction to solving your problems.

What is the app that generates answers to questions? Mindgrasp instantly creates accurate notes and answers questions from any Document, PDF, YouTube Video, Zoom Meeting, Webinar Recording, Podcast and much more!

Which app is best for quiz question and answers? Kahoot! Kahoot! is a popular quiz app widely used in education.

What is the app that answers quizzes? Quizzard is the ultimate tool for students taking online classes due to COVID-19 ?. Use Quizzard to find, study, and ace those online tests, quizzes, and exams in a matter of seconds! Search with incredible accuracy and sort answers by confidence.

What is the app that generates answers to questions? Mindgrasp instantly creates accurate notes and answers questions from any Document, PDF, YouTube Video, Zoom Meeting, Webinar Recording, Podcast and much more!

Which app can I use to check my Waec? WAEC Result Checker is an independent result checking application for the candidates of the West African Examinations Council. Nigeria, Ghana, Gambia, Liberia and Sierra Leone. Having a powerful Material Design interface, WAEC Result Checker have the right contents whenever you need them.

What is the app for JAMB questions and answers? The JAMB LFX app isn't just about practice questions; it's a complete study companion. With up-to-date syllabi, past questions, and personalized study plans, it's clear that this app is designed with the student's success in mind. Whether you're a first-time candidate or retaking the exam, this app is a must-have.

What is the best app for past GCE questions? Kawlo is African's number one examination study partner with past papers and answers for Cameroon gce, ecz, uneb and necta exams. It's one of your day to day teacher during your studies be it indoors or outdoors.

Schaum's Outline Series: Logic, Second Edition

Schaum's Outline Series is a renowned collection of study guides that help students master a wide range of subjects. The Logic edition, now in its second edition, provides a comprehensive review of fundamental logic concepts and principles. Here's a glimpse into the valuable questions and answers it offers:

Question 1: Define deductive validity and provide an example.

Answer: Deductive validity refers to the logical relationship between premises (statements that are given as true) and a conclusion (a statement that follows from

the premises). A deductive argument is valid if and only if it is impossible for the premises to be true and the conclusion false. For example, if the premise states "All cats are mammals" and the premise "Socrates is a cat," then the conclusion "Therefore, Socrates is a mammal" is deductively valid.

Question 2: What is the difference between a categorical proposition and a hypothetical proposition?

Answer: A categorical proposition makes a statement about the relationship between two terms, for instance, "All dogs are mammals." A hypothetical proposition, on the other hand, expresses a conditional relationship between two propositions, such as "If it rains, the grass gets wet."

Question 3: Explain the concept of quantifiers in propositional logic.

Answer: Quantifiers are symbols used to indicate the number of elements in a set. The universal quantifier (\forall) indicates that a statement holds for all members of a set, while the existential quantifier (\exists) indicates that a statement holds for at least one member of a set. For example, " $\forall x(x \text{ is a student})$ " means "All students are students," while " $\exists x(x \text{ is a student})$ " means "There is at least one student."

Question 4: Discuss the fallacy of false cause.

Answer: The fallacy of false cause occurs when a person incorrectly assumes that because one event follows another, the first event caused the second event. For instance, if a person observes that every time they cross a certain bridge, it rains, they may mistakenly conclude that crossing the bridge causes rain.

Question 5: What are the four basic types of syllogisms in deductive logic?

Answer: The four basic types of syllogisms are:

- A-type: All P are Q, All Q are R, Therefore, All P are R.
- E-type: No P are Q, All Q are R, Therefore, No P are R.
- I-type: All P are Q, Some Q are R, Therefore, Some P are R.
- O-type: No P are Q, Some Q are R, Therefore, Some P are not R.

Jealousy and In the Labyrinth: Two Novels by Alain Robbe-Grillet

ENGLISH LANGUAGE QUESTION AND ANSWER FOR WAEC 2017

1. What are the main similarities between "Jealousy" and "In the Labyrinth"?

Both "Jealousy" (1957) and "In the Labyrinth" (1959) are experimental novels by French author Alain Robbe-Grillet. They share several characteristics, including:

- **Objective Narration:** The narrators in both novels present events without providing any subjective interpretations or emotions.
- **Minimalist Style:** Robbe-Grillet's writing style is characterized by its restraint and economy of language.
- **Focus on Objects and Details:** The novels meticulously describe physical objects and surroundings, creating a hyper-realistic and fragmented atmosphere.
- **Ambiguous Characters:** The identities and motives of characters are often unclear, leaving readers to question their perceptions.

2. How does "Jealousy" explore themes of desire and suspicion?

"Jealousy" tells the story of a man who suspects his wife of infidelity. However, the narrative unfolds in a non-linear fashion, creating a sense of confusion and paranoia. The husband's jealousy manifests itself as a relentless search for evidence, which leads to an obsession with minute details and the constant surveillance of his wife.

3. What is the significance of the labyrinthine structure in "In the Labyrinth"?

"In the Labyrinth" follows a group of soldiers who are lost in a labyrinthine forest. As they wander through the maze, they become disoriented and increasingly alienated from one another. The labyrinth symbolizes the characters' inner turmoil and the search for meaning in a chaotic and incomprehensible world.

4. How do the novels reflect Robbe-Grillet's concept of the "new novel"?

Robbe-Grillet's "new novel" advocated for a departure from traditional storytelling techniques and an emphasis on objective description and the exploration of the objects and spaces that shape our perceptions. "Jealousy" and "In the Labyrinth" exemplify these principles by presenting fragmented narratives that challenge conventional notions of plot and characterization.

5. What is the lasting impact of these novels on experimental literature?

"Jealousy" and "In the Labyrinth" are considered landmarks in the development of experimental literature. Robbe-Grillet's innovative techniques and exploration of the subconscious and irrational continue to influence contemporary authors who push the boundaries of narrative form and defy traditional conventions.

Is Larson's calculus good? At Amazon.com, users of Larson's Calculus praise the book and give it a rating of 4.7 out of 5.

Is calculus 4 real? Calculus IV is an intensive, higher-level course in mathematics that builds on MAT-2320: Calculus II and MAT-3310: Calculus III.

Who is known as God of calculus? Mohit Tyagi Sir is very famous for his maths and tricks and techs in it. Yes, it's true he is called god of calculus bcoz of the following reason and this thing also inspired me a lot and I have seen all his lectures of calculus on his YouTube channel:- 1.

Which Calc is the hardest? Calculus 2 is harder for a few reasons: There is no central theme. Calculus 1 is about differentiation, and integration, and ends with the fundamental theorem, unifying the two subjects. Calculus 3 is about studying calculus in higher dimensions, and generalizing the fundamental theorem over and over.

Is there a Calc 5? Many schools have up to Calc 3, then there's real analysis, complex analysis, and differential equations (the last is sometimes split into 2 courses, depending on the school). Most schools probably don't have "calc 5" or above, but that hardly means that calc 1–3 covers all of calculus.

What is the hardest math course? 1. Real Analysis: This is a rigorous course that focuses on the foundations of real numbers, limits, continuity, differentiation, and integration. It's known for its theoretical, proof-based approach and can be a paradigm shift for students used to computation-heavy math courses.

What's the highest level of math? A doctoral degree is the highest level of education available in mathematics, often taking 4-7 years to complete. Like a master's degree, these programs offer specializations in many areas, including

computer algebra, mathematical theory analysis, and differential geometry.

Who taught himself calculus? In the early 1930s Richard Feynman's high school did not offer any courses on calculus. He decided to teach himself calculus and read *Calculus for the Practical Man* and took meticulous notes.

Who called math god? Answer. Archimedes(a greek mathematician)is known as the god of maths.

Who is the real father of calculus? Calculus is commonly accepted to have been created twice, independently, by two of the seventeenth century's brightest minds: Sir Isaac Newton of gravitational fame, and the philosopher and mathematician Gottfried Leibniz.

What's higher than Calc? After completing Calculus I and II, you may continue to Calculus III, Linear Algebra, and Differential Equations.

Is Calc or Trig harder? Calculus often presents more abstract and challenging problems, which may partially explain why it is considered the more difficult of the two courses. Regardless of which course you choose, remember to dedicate time to practicing problems and seeking help from your teacher or peers when necessary.

Is Calc harder than Chem? People's opinions about this will certainly differ. But for what it's worth, I found calculus to be much easier than chemistry. Calculus involves a small handful of ideas that find applications in enormous giant-hand-handfuls of situations.

Who is the best calculus teacher on YouTube?

Has anyone gotten a perfect calc BC score?

What calculus book does Harvard use? AB possible introductory texts, we mention *Differential and Integral Calculus* by R. Courant, *Calculus* by T. Apostol, *Calculus* by M. Spivak, and *Pure Mathematics* by G.

Is Calc 2 the hardest class in college? Many students indeed find Calculus 2 quite challenging, but whether it's the "hardest" math class comes down mostly to the individual student's strengths, weaknesses, and previous exposure to mathematics.
