Java SE 8 and Beyond: Frequently Asked Questions

1. What major new features were introduced in Java SE 8?

- Lambdas: Allow for concise and expressive code by representing anonymous functions as objects.
- Streams API: Provides a powerful way to manipulate and process data sequences.
- Default methods in interfaces: Enhance the extensibility of interfaces by allowing implementations to provide default behaviors.
- New Date/Time API: Replaces the legacy date/time APIs with a more modern and intuitive system.

2. What are the key benefits of using lambdas and the Streams API?

- Improved code readability and maintainability by reducing the need for verbose anonymous inner classes.
- Enhanced performance and scalability due to efficient stream processing techniques.
- Increased flexibility and composability, enabling the creation of complex data pipelines.

3. How do you use default methods in interfaces?

- Declare a default method in an interface using the `default` keyword.
- Implementations are optional and can provide default behaviors for concrete classes.
- Default methods allow for the addition of new functionalities without breaking existing code.

4. What are the advantages of using the new Date/Time API?

- Enhanced temporal data representation with support for time zones, calendars, and durations.
- Immutable objects ensure thread safety and prevent data corruption.
- Improved performance and flexibility compared to the legacy date/time APIs.

5. What are some of the notable enhancements in Java SE 9 and beyond?

- Modules: Provide a structured way to organize and package code, improving encapsulation and maintainability.
- Java Platform Module System (JPMS): Manages dependencies between modules and ensures isolation.
- JShell: An interactive shell environment for experimenting with Java code.
- Local-Variable Type Inference (var): Simplifies code by allowing the compiler to infer types for local variables.
