The Behaviour Change Wheel (TCB): Unlocking Effective Interventions

The Behaviour Change Wheel (TCB) is a comprehensive framework developed by Michie and colleagues that provides a systematic approach to designing and implementing effective behaviour change interventions. Here are some commonly asked questions and answers about the TCB:

1. What is the TCB? The TCB is a visual tool that maps out the key factors that influence health behaviours. It consists of three concentric wheels: the outer wheel represents the nine intervention functions required for behaviour change, the middle wheel depicts 19 behaviour change techniques, and the inner wheel shows seven policy categories.

2. How do I use the TCB? The TCB can be used in a variety of ways, such as:

- Identifying the key factors that influence a particular behaviour
- Selecting appropriate behaviour change techniques and interventions
- Evaluating the effectiveness of interventions

3. What are the nine intervention functions? The nine intervention functions are:

- Education
- Persuasion
- Incentivization
- Coercion

- Training
- Restriction
- Environmental restructuring
- Service provision
- Modelling

4. What are the 19 behaviour change techniques? The 19 behaviour change techniques are:

- Goal setting
- Action planning
- Self-monitoring
- Feedback
- Problem solving
- Social support
- Habit formation
- Reinforcement
- Prompts and cues
- Stimulus control
- Contingency management
- Shaping
- Cognitive restructuring
- Relaxation techniques
- Exposure therapy
- Social comparison
- Gamification

5. What are the seven policy categories? The seven policy categories are:

- Fiscal measures
- Regulation and legislation

- Communication and marketing

Unfolding the Napkin: A Hands-On Method for Solving Complex Problems with Simple Pictures

By Dan Roam, December 2009

What is the "Unfolding the Napkin" method?

The "Unfolding the Napkin" method is a visual problem-solving technique that uses simple drawings to break down complex problems into manageable chunks. It was developed by author and consultant Dan Roam, who published a book on the method in 2009.

How does the method work?

The method involves six steps:

1. **Draw the problem:** Sketch out the problem statement in a simple drawing.
2. **Identify the key elements:** Mark the main elements of the problem on the drawing.
3. **Find the connections:** Draw lines to show how the elements are related.
4. **Simplify the model:** Remove unnecessary details and focus on the essential elements.
5. **Generate solutions:** Use the drawing to explore different solutions to the problem.
6. **Take action:** Choose a solution and implement it.

What are the benefits of the method?

The "Unfolding the Napkin" method offers several benefits, including:

- **Improved understanding:** The drawings help to visualize the problem and make it easier to understand.
- **Enhanced communication:** The drawings can be used to communicate the problem and its solution to others.
- **Increased creativity:** The visual nature of the method encourages out-of-the-box thinking.
- **Greater efficiency:** The method can help to identify the root cause of a problem and develop effective solutions more quickly.

Who can use the method?

The "Unfolding the Napkin" method is suitable for people of all backgrounds and skill levels. It can be used by individuals, teams, and organizations to solve complex problems in a variety of settings, including business, education, and engineering.

How can I learn more about the method?

Roam's book, "Unfolding the Napkin: The Hands-On Method for Solving Complex Problems with Simple Pictures," provides a detailed guide to the method. The book includes numerous examples and exercises to help you apply the method to your own problems.
