The Boeing 787 Dreamliner: An In-Depth Analysis**

Is 787 and 787 Dreamliner the same?

Yes, 787 and 787 Dreamliner refer to the same aircraft. The Dreamliner is the marketing name for the Boeing 787.

How much did the Boeing 787 Dreamliner project cost?

The development and certification of the Boeing 787 Dreamliner project cost an estimated \$32 billion.

What is so special about the Boeing 787 Dreamliner?

The Boeing 787 Dreamliner is a revolutionary aircraft that features:

- Advanced composite materials, reducing weight and improving fuel efficiency
- A spacious and comfortable cabin with larger windows and mood lighting
- Advanced avionics and flight control systems
- Electrically powered systems, eliminating the need for hydraulics

How much did the 787 Dreamliner simulator cost?

A single Boeing 787 Dreamliner simulator costs approximately \$10 million.

Which is better, Dreamliner or A350?

The Boeing 787 Dreamliner and the Airbus A350 are both excellent aircraft, but they have different strengths and weaknesses. The Dreamliner is generally more fuel-efficient, while the A350 has a wider fuselage and a more advanced cabin.

Is a 777 bigger than a 787?

Yes, the Boeing 777 is larger than the Boeing 787 in terms of size and passenger capacity.

Who owns the only private 787 Dreamliner?

Ken Griffin, the founder of Citadel LLC, purchased the only privately owned Boeing 787 Dreamliner in 2015.

Why is the Boeing 787 so expensive?

The Boeing 787 is expensive due to its advanced technology, composite materials, and the costs associated with its development and certification.

Has the 787 made a profit?

Yes, the Boeing 787 has made a profit. The aircraft is a best-seller, with over 1,500 orders received.

Why is it called Dreamliner?

The Boeing 787 was originally named the "Sonic Cruiser" but was later renamed "Dreamliner" to evoke positive emotions and represent the aircraft's advanced capabilities.

What went wrong with the 787?

In 2013, a series of battery fires and overheating incidents involving the Boeing 787 led to the aircraft's grounding and a suspension of deliveries while modifications were made.

Why was the 787 Dreamliner grounded?

The 787 Dreamliner was grounded in 2013 due to safety concerns related to its lithium-ion batteries. The issue was subsequently resolved, and the aircraft was cleared to fly again.

Is the 787 a success?

Yes, the Boeing 787 Dreamliner is a success. The aircraft is popular with airlines and passengers alike and has become a staple in the long-haul aviation market.

What are the flaws of the 787 Dreamliner?

Some of the flaws of the Boeing 787 Dreamliner include:

- Its high cost compared to other aircraft
- Its complex maintenance requirements
- Some reliability issues and technical glitches

How many 787 Dreamliners are flying?

As of 2023, over 1,000 Boeing 787 Dreamliners are in service worldwide.

Why do pilots like A350?

Pilots like the Airbus A350 because it offers advanced avionics, a user-friendly cockpit, and excellent handling characteristics.

Who are the competitors of the 787 Dreamliner?

The Boeing 787 Dreamliner's main competitors are:

- Airbus A330neo
- Airbus A350

Are Airbus safer than Boeing?

Airbus and Boeing aircraft have similar safety records. Both manufacturers have excellent engineers and rigorous safety protocols.

Is there a Boeing 797?

No, there is no Boeing 797. Boeing skipped the 797 designation and went straight to the Boeing 787.

Is the 787 safe to fly?

Yes, the Boeing 787 Dreamliner is safe to fly. It has undergone rigorous testing and certification and has an excellent safety record.

Which is bigger A380 or 787?

The Airbus A380 is considerably larger than the Boeing 787 in terms of size and passenger capacity.

Why is the 787 called a Dreamliner?

The Boeing 787 is called a Dreamliner because its advanced features and sleek design were intended to evoke positive emotions and represent the aircraft's ability to make flying more enjoyable.
