What business study makes the most money?

What is the highest level in business? This is the highest-ranking role in a company. CEOs oversee all business operations and decisions and are responsible for the success of the organization.

Which is harder, accounting or economics? The difficulty of either field will depend on the individual's strengths and interests. Some people may find accounting to be more challenging due to its focus on detail-oriented tasks, while others may struggle with the abstract concepts in economics.

Is economics harder than business? For economics, you don't have to study as much but at the same time you would do better in a business exam compared to an economics exam without studying because Economics is quite complex when it

comes to the definitions as you have to use specific words which you could only remember if you studied.

Should I study economics or business? The most crucial question to ask yourself is whether you are a "big picture" or "detail-oriented" person. If you want to know how the economy works, you should study economics. If all you want to do is manage or work for a certain company, business administration is the course for you.

Is Business Studies a level? A-level Business Studies opens up many options for students at university, and there are many courses available with permutations of Business/Management/Administration/ Accounting and Finance.
