3. What seals live in polar regions?

Polar bears, despite their name, are classified as marine mammals and are found in the Arctic and sub-Arctic regions. They have a thick layer of fur and rely on sea ice for hunting, mating, and resting.

4. How do marine mammals communicate?

Marine mammals use a variety of vocalizations to communicate with each other. Whales produce low-frequency sounds that can travel long distances, facilitating communication over vast oceans. Dolphins use high-pitched whistles and clicks to echolocate prey and communicate within their social groups.

5. What are the threats facing marine mammals?

Marine mammals face numerous threats, including habitat loss, hunting, entanglement in fishing gear, and climate change. Conservation efforts are crucial to protect these creatures and ensure their survival in our oceans.
