## **The Single Economic Entity Doctrine and Corporate Group Responsibility in European Antitrust Law**

### **International Competition Law Series**

#### **Introduction**

The single economic entity doctrine is a legal principle that treats a group of companies as a single economic entity for the purposes of antitrust law. This doctrine has been applied by the European Commission ("Commission") in a number of cases involving parent companies and their subsidiaries, as well as other forms of corporate groups.

**Q: What is the purpose of the single economic entity doctrine?**

A: The purpose of the single economic entity doctrine is to prevent companies from evading antitrust liability by structuring their operations in a way that makes it difficult to determine which entity is responsible for anti-competitive conduct.

**Q: When does the single economic entity doctrine apply?**

A: The single economic entity doctrine may apply when a group of companies acts as a single economic unit in the relevant market. Factors that may be considered in determining whether a single economic entity exists include:

THE KETODIET COOKBOOK MORE THAN 150 DELICIOUS LOW CARB HIGH FAT RECIPES FOR

- Common ownership and control
- Interdependence in decision-making
- Functional integration of operations
- Financial integration

**Q: What are the implications of the single economic entity doctrine for corporate group responsibility?**

A: The single economic entity doctrine can have significant implications for corporate group responsibility. Under this doctrine, a parent company may be held liable for the anti-competitive conduct of its subsidiaries, even if the parent company was not directly involved in the conduct. This is because the parent company and its subsidiaries are treated as a single economic entity.

**Q: Are there any exceptions to the single economic entity doctrine?**

A: Yes, there are a few exceptions to the single economic entity doctrine. These exceptions include:

- Where the subsidiary has a separate legal personality and acts independently of the parent company
- Where the parent company can demonstrate that it has no control over the subsidiary's conduct
- Where the subsidiary's conduct is not in the interest of the parent company

**Conclusion**

The single economic entity doctrine is a complex legal principle that can have significant implications for corporate group responsibility under European antitrust law. Companies should be aware of the doctrine and its potential implications when structuring their operations.
