The Bridges of God: A Natural Wonder in Utah

What are the Bridges of God?

The Bridges of God are a series of three natural sandstone bridges located in San Juan County, Utah. Formed by the erosion of the White Rim Trail, these bridges span the canyons of the Colorado River. The largest of the three, known as the Kolob Crossing, is an impressive 128 feet wide and 200 feet tall.

How did the Bridges of God form?

Over millions of years, the Colorado River has carved out canyons into the sandstone bedrock of the region. The Bridges of God were formed when wind and water eroded the softer sandstone, leaving behind the more resistant layers in the form of bridges. The three bridges are located in a line, suggesting that they were once part of a single larger bridge that collapsed over time.

Why are the Bridges of God so famous?
