Zetetic Astronomy: Earth Not a Globe

By Samuel Birley Rowbotham

1865 Hardcover

Question: What is Zetetic Astronomy?

Answer: Zetetic Astronomy is a pseudoscientific theory that claims the Earth is flat and not a globe. It was proposed by Samuel Birley Rowbotham in the 19th century.

Question: What evidence does Rowbotham present in his book?

Answer: Rowbotham's book, "Zetetic Astronomy," contains various experiments and observations that he claims support the flat Earth theory. These include the absence of curvature on the horizon, the behavior of water in a level canal, and the alleged impossibility of seeing distant objects from a great height.

Question: Are Rowbotham's claims supported by scientific evidence?
