**Transport Processes and Separation Process Principles Solution 4th Edition:  
A Comprehensive Guide**

**Question 1: Explain the concept of mass transfer.**

**Answer:** Mass transfer is the movement of mass from one region to another due to a difference in concentration. It involves the transport of chemical species across a phase boundary, such as from a gas to a liquid or from a solid to a gas.

**Question 2: What are the different modes of mass transfer?**
