

# Alphard instruction manual

## Download Complete File

**What is the password for Alphard V2 app?** Once you downloaded the app, open it and turn on your V2. You should see “ewheels1”. Click on it and the default password is 123456.

**How long does it take to charge Alphard?** It should take about 4 hours to fully charge the battery from a drained/low level. You can switch on the power on the Club Booster console during charging to check the battery level. Unplug the charger after charging is complete, which will prolong battery life.

**How to pair V2 alphard?**

**How do I find my Toyota password?** You can reset your password online or call 1-800-331-4331 for a Toyota Brand Engagement Center representative to email you a password reset link.

**What is the admin password for smart door lock?** When your Smart Door Lock is in the factory default state (i.e. after a factory reset), the admin passcode is 123456.

**How long does an Alphard battery last?** So you can play at least 500 rounds. That is about 5 years before having to replace the battery, if you play 2 times a week. The battery drops lower than 70% of its normal capacity when it is considered to be exhausted. So when you find it cannot make 18 holes, then you should replace your battery.

**Can you use Alphard V2 in the rain?** Our V2 Club Booster is weatherproof and can be played in the rain. The motors are sealed with rubber gasket and the motherboards are conformal coated. However, you want to avoid exposing it under heavy rain for a long period of time to allow moisture to build inside the unit.

**Should I charge my hybrid car to 100?** Extended Battery Life Batteries charged to full capacity consistently experience more stress and heat, which accelerates degradation. Keeping the charge level below 100%, typically between 80% to 90%, helps maintain the battery's health and functionality over a longer period.

**How to sync V2 remote?**

**Can I unlock my Toyota with my phone?** Ensure you have an active Remote Connect with Digital Key subscription. Follow the steps in the Toyota app to set up the Digital Key to your smartphone and your vehicle. Test the unlock, start, and lock functions to confirm the setup process was successful. \*Select Model Year 2022 and newer vehicles.

**How do I find out what my password is?** Your passwords are saved in your Google Account. To view a list of accounts with saved passwords, go to [passwords.google.com](https://passwords.google.com) in any browser or view your passwords in Chrome. To view passwords, you need to sign in again. To view a password: Select an account and then preview your password.

**What is Toyota WIFI password?** What if I forget my Wi-Fi hotspot password? Select the "Menu" hard key on the head unit. On the head unit touchscreen, find and select "Setup," then "Wi-Fi," then "Password." From here, you can toggle "Show Characters" on to view your current password. How do I turn the Wi-Fi hotspot on/off?

**What is the default code for door lock?** Because most of the default code of the keypad door lock are very simple when they are set at the factory, either 00000 or 1234, which can be easily deciphered by strangers, it is very important to change a use code that only you know and is not easy to be guessed by others.

**What is the admin passcode?** An 'Admin Password' is a password used to access and manage administrative settings and functions on a device or system, such as a Nokia device, allowing users to make changes and configure settings.

**How to reset passcode on door lock?**

**How do I change the battery in my Alphard?**

---

**What battery does Toyota Alphard use?** Alphard AH10 Battery AGM, EFB, GEL.

**How long does it take to charge Alphard V2 battery?** Fully charges in about 3-4 hours. Guaranteed to last 18 holes under warranty, but can last up to 36 holes depending on conditions. Comes with a universal charger suitable for line voltage between 100 – 240VAC, 50/60Hz input, 42VDC 1.5A MAX output.

**How hot is Alphard?**

**How much does the Alphard golf weight?** Technical Specifications. Weight: 21lbs. + Battery (4lbs.)

**Can you use the MGI Zip Navigator in the rain?** MGI recommends covering the caddie when it rains. I've used it in light rain/mist without a cover with no problem, but I don't plan on using it if a heavy rain is forecast. In wet conditions, the caddie runs like a champ, much better than my previous caddie (different company).

**What is the 20/80 battery rule?** What is the 20-80% battery rule? Simply, the 20-80% rule suggests keeping the battery of an electric vehicle charged between 20% and 80% of full capacity. It's a method of electric vehicle charging meant to improve battery life. Think of it as the green zone.

**Should I charge my EV to 80 every night?** There are two reasons: charging performance and battery longevity. Most of the time you should only charge an EV to 80% because charging rates slow down dramatically past the 80% mark. And two, the long-term health of your vehicle's battery pack is improved when kept below 100%.

**Should I charge my hybrid car every night?** Generally speaking, don't charge every day unless you need to. Natural degradation may occur in the battery based on the number of charging cycles that are used over its lifespan. EV Battery performance and durability can deteriorate if the charger is used constantly.

**What is the default password for fleet manager ii?** The default password for administration mode is "Admin" without the quotes.

**Where is the password for Toyota Wi-Fi?**

**What is the default password for UniFi AP AC V2?** As long as the UniFi Access Point has not been previously setup or adopted by the software, and only if you are attempting to connect via SSH, then always use the default username and password of ubnt / ubnt.

**What is the password for the Huawei router app?** To find the login info: Try the admin/login info (not the Wi-Fi password or WEP key) that's printed on your router's sticker or nameplate first. Next, try admin as the username and the admin as the password, as most Huawei routers use this login information.

**How do I reset my fleet manager password?** In the navigation pane, choose Fleet Manager. Choose the button next to the node that needs a new password. Choose Instance actions, Reset password. For User name, enter the name of the user for which you're changing the password.

**What is the default system manager ID and password?** The factory default System Manager ID and password is 7654321 for both ID and password.

**What is the default password for Osprey?** The default password is "osprey". In order to maintain device security, it is recommended you change the default password. Reboot performs a complete power reset of the device. Make sure you save all of your settings before rebooting.

**Is Toyota car Wi-Fi free?** Connected Services by Toyota trials are at no extra cost. All trials begin on the original date of purchase or lease of a new vehicle, with the exception of Wi-Fi for which the trial begins at the time of activation. Paid subscription required after trial in order to continue accessing the respective services.

**How to get Toyota Connect for free?** The Toyota Remote Connect trial period is at no extra cost and begins on the original date of purchase or lease of a new vehicle. Paid subscription required after trial to access the service.

**How do I reset my Toyota Wi-Fi password?**

**What is the root password for UniFi AP?** All UniFi devices For example, all other UniFi APs and switches use the default credentials of 'ubnt' for the username and

'ubnt' for the password.

**What is the default password for UniFi WiFi?** Default user name is pre-filled with ubnt. Looking the documentation, it's mentionned: "There are two possible combinations of default credentials for UniFi devices: ubnt / ubnt or root / ubnt."

**How to find UniFi username and password?** Click the Forgot Password button on the login screen when attempting to connect to UniFi. You will receive a password reset email at the address associated with your UI Account, or at the SMTP server which was manually configured. If you did not receive an email, contact the original UniFi owner or administrator.

**What is the master password for Huawei router?** The default username and passcode for AR150, AR160, and AR200 series routers are administrator, Admin@huawei, or admin. Changing the default password on a Huawei WiFi router is very important because the router is a critical component. It aids in the connection of all of your devices to the internet.

**What is the 192.168 1.1 username and password change?** What is the 192.168.1.1 admin username and password? admin/admin is the most common username/password but that depends on the type of router. Other popular username/password combinations are admin/Admin, admin/password, and admin/1234. You can check the list of common router logins if none of those combinations work.

**What is the default username and password for a router?** Retrieve Default Username and Password: You can usually find these details in the Router Manual or Handbook, or on a sticker located on the bottom or back of your router. The default username is often admin, and the password is typically either admin or password.
