## **SIT: Systematic Inventive Thinking**

**What is SIT?** SIT is a problem-solving methodology developed by Genrich Altshuller in the 1950s. It is based on the idea that all problems have a limited number of generic solutions. By recognizing these generic solutions, SIT systematically guides users through a process of identifying and solving problems in a creative and efficient manner.

**How does SIT work?** SIT consists of a set of tools and techniques that help users:

- Define the problem clearly
- Identify the underlying generic solution
- Generate multiple solutions
- Select and implement the best solution

**What are the benefits of using SIT?** SIT offers several benefits, including:

- Improved problem-solving effectiveness
- Increased creativity and innovation
- Reduced time and effort spent on problem-solving
- Better quality of solutions

**How can I learn more about SIT?** There are various resources available to learn more about SIT, such as books, articles, and online courses. Some popular resources include:

---

- "The Innovation Algorithm" by Genrich Altshuller
- "Systematic Inventive Thinking" by Sam Waters
- "The SIT Toolkit" by David Gann

**Is SIT effective?** SIT has been used successfully in a wide range of industries, including engineering, manufacturing, healthcare, and business. Numerous case studies have demonstrated its effectiveness in solving complex problems and generating innovative solutions.
