

# Americans answer section 4 reteaching activity

## Download Complete File

**How did the growth of the defense industry affect American population patterns?** The labor demands of war industries caused millions more Americans to move--largely to the Atlantic, Pacific, and Gulf coasts where most defense plants located.

**What did the United States do after World War I began in Europe?** When WWI began in Europe in 1914, many Americans wanted the United States to stay out of the conflict, supporting President Woodrow Wilson's policy of strict and impartial neutrality. "The United States must be neutral in fact as well as in name during these days that are to try men's souls.

**How did WWII affect returning GIs?** At the same time, millions of GIs had returned from the war. This set up a potential conflict, pitting men and women against each other for the same jobs. In the postwar period, most female workers felt a duty to step aside for men. They had been told throughout the war that their jobs were temporary.

**How did the war affect returning GLS?** Many returned physically, mentally, or emotionally wounded by their combat experiences. Amid the horrors of war, though, many gained a greater appreciation for such American ideals as liberty and came home with a new sense of pride in themselves and in their country.

**How did the growth of industry affect American population patterns?** Owing most of their population growth to the expansion of industry, U.S. cities grew by about 15 million people in the two decades before 1900. Many of those who helped account for the population growth of cities were immigrants arriving from around the

world.

**How did the growth of industry affect American society?** Industrial growth transformed American society. It produced a new class of wealthy industrialists and a prosperous middle class. It also produced a vastly expanded blue collar working class.

**What was the nickname for US soldiers during war?** doughboy, nickname popularly given to United States soldiers during World War I. The term was first used during the American Civil War when it was applied to the brass buttons on uniforms and thence to infantrymen.

**Which country played the biggest role in WWII?** While most see the United States as having played the crucial role in vanquishing Adolf Hitler, the British, according to polling data released this week, see themselves as having played the biggest part in the war effort — although they acknowledge that the Nazis would not have been overcome without the Soviet Union ...

**What effect did the war in Europe have on the United States economy?** America's response to World War II was the most extraordinary mobilization of an idle economy in the history of the world. During the war 17 million new civilian jobs were created, industrial productivity increased by 96 percent, and corporate profits after taxes doubled.

**How did soldiers returning from World War II impact the economy?** Returning veterans came home to a nation experiencing dramatic economic growth and social change. Following the war, the arsenal of democracy that pushed out the military equipment needed to fight World War II shifted to production of commercial and industrial goods sold in both domestic and international markets.

**What did most Japanese Americans face after leaving camp?** After WWII ended, many Japanese had no real homes to go back to since the us government seized their homes and assets and then sold it off to other Americans. They also allowed other Americans to loot everything in their home, so they really lost everything. They had no homes, no cars and no belongs.

**What problems did returning African American soldiers have?** racial violence and segregation. The problems that African American soldiers had when they returned from World War I were racial violence and segregation. Almost 380,000 black soldiers went to fight at the World War I. The African Americans could not integrate into society's structures as well as they had wished.

**What do Germans think about WWII?** As the generation that elected Adolf Hitler and fought his genocidal war dies away, most Germans today see World War II through the prism of guilt, responsibility and atonement. And almost all agree that the defeat of the Nazis was a good thing.

**What is the returning war effect?** The returning soldier effect is a phenomenon which suggests that more boys are born immediately after wars. This effect is one of the many factors influencing human sex ratio. It was especially noticeable worldwide during and right after both of the World Wars.

**How did German civilians feel about WWII?** German civilians had known about the thousands of concentration camps, millions of slave laborers, and aggressive wars their nation started, yet most took no actions to stop the war or save their Jewish, Roma, homosexual, and Slavic neighbors.

**What were the effects of the Second Industrial Revolution?** Effects of the Second Industrial Revolution Transportation, lightbulbs, and communication became more accessible for many people, which improved their quality of life. However, this also led to the 10-hour workday and extremely dangerous working conditions for railway construction workers.

**What was the most important result of the Second Industrial Revolution?** Electrification allowed the final major developments in manufacturing methods of the Second Industrial Revolution, namely the assembly line and mass production. Electrification was called "the most important engineering achievement of the 20th century" by the National Academy of Engineering.

**How did the Second Industrial Revolution change the United States?** Rapid advances in the creation of steel, chemicals and electricity helped fuel production, including mass-produced consumer goods and weapons. It became far easier to get

around on trains, automobiles and bicycles.

**Why did many immigrants choose to settle in cities?** The most likely reason is that immigrants often send a significant share of their income back to their origin country. As a result, they value a city's high wages and are less discouraged by the high living costs than native-born workers.

**What did America look like in 1870?** In 1870, America was in the middle of great change as the Second Industrial Revolution was just starting, and millions of immigrants were heading for the US. At the time, fashion was more formal, and people loved traveling by carriage, steamboat, or railway. Americans were also shopping via catalogs 150 years ago.

**What are the advantages and disadvantages of industrialization?** The advantages include lower-cost clothing, more job opportunities, and improved transportation. And the negatives would include women and children being exploited, working long hours, and environmental damage. These are just a few consequences of the Industrial Revolution for Europe.

**What impact did the war have on the movement of populations?** Large populations were forced to leave their homes because their communities were turned into battlefields during the war. These populations had to move elsewhere if they wanted to survive. These people became refugees who had no idea when the war was going to end or what was going to happen to them.

**In what ways did the war affect American citizens?** It also affected the lives of Americans on the home front. Much of this impact was associated with mobilizing for the war. People moved to new places across the country to work and to train and their lives changed. Factories re-tooled and ran around the clock to produce weapons and other military supplies.

**How did the Great War change migration patterns in the United States?** The Great War changed migration patterns in the United States by leading to the movement of African Americans from the South to the industrial North, the migration of Mexicans to the rural United States for food supply production, and an increase in Mexican immigrants seeking economic opportunities in western factories ...

**How did the growth of the military-industrial complex affect the Sunbelt region in the 1950s?** Beginning in the 1950s, the region saw a boom in population as citizens were attracted to new economic opportunities tied to military bases and industrial, agricultural, and commercial development throughout the region.
