

# A contrastive analysis of the morphological aspects of assamese and oriya

## [Download Complete File](#)

**What is the phonology of the Assamese language?** Phonology. The Assamese phonemic inventory consists of eight vowels, ten diphthongs, and twenty-three consonants (including two semivowels).

**What are the features of Assamese language?** Its grammar is noted for its highly inflected forms, and there are also different pronouns and noun plural markers for use in honorific and nonhonorific constructions. Assamese is also closely related to Bengali; like Bengali and Oriya, Assamese has no grammatical gender distinctions.

**What is the language controversy in Assam?** Official Language Movement The Assam Sahitya Sabha passed two resolutions, one in 1950 and another in 1959, stressing the need to make Assamese the official language in Assam. The April 1959 resolution, demanding that Assamese be made the sole official language in Assam-sparked political reaction.

**What are the diphthongs in Assamese?** Six Assamese falling diphthongs /ai, au, oi, ou, ei, eu/ and two level diphthongs /iu, ui/ appeared in a list of words.

**What is the style of Assamese language?** Writing Style & Grammar: The script of the Assamese language varies from that of the Eastern Nagari script. The Assamese script has its source from the Gupta script. The Assamese script has a very unique style of writing basically on the bark of the `saanchi tree`.

**Is Assamese a hard language?** The sounds of words in Assamese have a soothing quality and the language itself is easy to learn. It has similarities with Bengali, Odia and Hindi as well.

## **What do we say "I love you" in Assamese?**

**What is the phonology of spoken language?** Phonology is the study of the patterns of sounds in a language and across languages. Put more formally, phonology is the study of the categorical organisation of speech sounds in languages; how speech sounds are organised in the mind and used to convey meaning.

**What is the phonology structure of language?** Phonology deals with sound structure in individual languages: the way distinctions in sound are used to differentiate linguistic items, and the ways in which the sound structure of the 'same' element varies as a function of the other sounds in its context.

**What language has the largest phonology?** Taa /ʔtʔʔ/ TAH, also known as ʔXóõ /ʔkoʔ/ KOH (also spelled ʔKhong and ʔXoon; Taa pronunciation: [ʔʔʔʔʔʔʔ]), is a Tuu language notable for its large number of phonemes, perhaps the largest in the world.

**What is the phonology of the sound system of language?** The term phonology refers to the sound system of a language. Phonological processing is required for the comprehension and production of spoken as well as written language. Disorders of phonological processing may be developmental in nature or may be acquired as a result of damage to the brain.
