### **How does social influence affect our behavior?**

Conformity refers to the tendency to adjust our behavior to match the behavior of others, even when we know it is incorrect. Obedience describes the tendency to follow the orders of an authority figure, even if we believe the order is wrong. Persuasion involves changing someone's attitudes or beliefs through communication.

Attitudes are our evaluations of people, objects, or ideas. They influence our thoughts, feelings, and behaviors. ### **How can social psychology be applied in real-world settings?**

Social psychology research has practical applications in various fields.
