**What are some biology questions and answers?**

**What are the hardest questions in biology?**

**What are good questions to ask in biology class?**

**How do you answer a biology question?**

**What are 5 interesting facts about biology?**

**What is biology best answer?** What is biology? Biology is a branch of science that deals with living organisms and their vital processes. Biology encompasses diverse fields, including botany, conservation, ecology, evolution, genetics, marine biology, medicine, microbiology, molecular biology, physiology, and zoology.

**What is a tricky science question?** Can air make shadows? Can gold be created from other elements? Can light bend around corners? Can momentum be hidden to human eyes like how kinetic energy can be hidden as heat? Can one bit of light bounce off another bit of light?

**Who is the father of bio?** Therefore, Aristotle is called the Father of biology. He was a great Greek philosopher and polymath. His theory of biology also known as the "Aristotle's biology" describes five major biological processes, namely, metabolism, temperature regulation, inheritance, information processing and embryogenesis.

**What is the hardest biology topic?** Biology definitely has the most even spread when it comes to what students struggle with. It is different every year and there aren't too many key topics that reoccur time and time again, but life processes are

definitely one of the most difficult topics to grasp - namely photosynthesis and respiration.

### **What questions do biologists ask?**

**What are the essential questions in biology?** How do organisms live, grow, respond to their environment and reproduce? How do the structures of organisms enable life's functions? How do organisms grow and develop?

**What is the best thing about biology?** Not only does it provide a strong foundation in the natural sciences, but it also prepares students for various careers in fields such as healthcare, research, education, and environmental conservation. One of the main benefits of a biology degree is the breadth of knowledge that students gain.

**What is the hardest question in biology?** How do cells decide their fate? The process by which a cell decides to become a specific cell type, especially during embryonic development, is a fundamental question in biology.

### **What are the 6 big questions of biology with answers?**

**What is a scientific question in biology?** It may be a verification question, theory question, or experimental question. A scientific question should be narrow enough to answer with data gathered by observation or testing. It should not be a question about opinion.

**What are the essential questions in biology?** How do organisms live, grow, respond to their environment and reproduce? How do the structures of organisms enable life's functions? How do organisms grow and develop?

**What questions do biologists try to answer?** Questions about the living world. Biologists are scientists who study living organisms and their interactions with the environment. They attempt to answer questions related to the living world, such as how organisms function, grow, and reproduce, as well as how they interact with other organisms and their environment.

**What is biology in very short answer?** Biology is a natural science discipline that studies living things. It is a very large and broad field due to the wide variety of life found on Earth, so individual biologists normally focus on specific fields. These fields

are either categorized by the scale of life or by the types of organisms studied.

**What is a describe question in biology?** “Describe” questions want to know what is happening in front of you – perhaps in a graph, a scientific diagram or a picture. You need to describe what you can see! A typical A-level Biology graph. Describe – What can you see?
