**Quel était le but du sarcophage ?** Un sarcophage (qui signifie « mangeur de chair » en grec) est un cercueil pour les sépultures par inhumation , largement utilisé dans tout l'empire romain à partir du II<sup>e</sup> siècle après JC. Les plus luxueux étaient en marbre, mais ils étaient également faits d'autres pierres, du plomb (65.148 ), et du bois.

**Quelle est la différence entre un cercueil et un sarcophage ?** "Cercueil, c'est quand c'est en bois. Sarcophage, c'est quand c'est en métal ou en pierre. C'est la petite différence qu'on fait quand on est en égyptologie", a expliqué Bénédicte Lhoyer, égyptologue, vendredi sur le plateau de LCI.

**Qui est Tetiki ?** Tétiki, un jeune garçon âgé de 15 ans, est le fils de Ramose, le nomarque d'Éléphantine. Il passe son temps à explorer la campagne et à chasser en compagnie de son meilleur ami, Penou, un nain à la peau noire venu de Nubie, et Didiphor, un singe très intelligent.

**Qui se trouve dans le sarcophage ?** Un sarcophage est une cuve destinée à recueillir un cadavre ou un cercueil. Le plus souvent sculpté dans la pierre et placé au-dessus du sol, il est parfois enterré.

## **The Sign and Seal Quest for the Lost Ark of the Covenant: Graham Hancock's Exploration**

### **Paragraph 1:**

Graham Hancock, a renowned author and explorer, has embarked on a controversial quest to uncover the truth behind the legendary Ark of the Covenant. According to the Bible, the Ark was a sacred object containing the Ten Commandments and other sacred relics. Hancock's quest has raised questions about the historical accuracy of the Ark and its potential significance.

### **Paragraph 2:**

One key aspect of Hancock's exploration involves the search for a "sign" that would authenticate the Ark's existence. A sign could be a physical artifact or a secret code that would corroborate the ancient texts. Hancock has investigated various locations, including Ethiopia and the Holy Land, in search of such a sign.

### **Paragraph 3:**

Another component of Hancock's quest is the search for a "seal." A seal would be a physical imprint or mark that would indicate the Ark's presence. Some theories

suggest that the seal may be located in an underground chamber or an ancient structure. Hancock has explored potential sites in various parts of the world, hoping to uncover this crucial evidence.

#### **Paragraph 4:**

Critics of Hancock's quest argue that the Ark of the Covenant is a myth and that his exploration is based on speculation and misinterpretation of ancient texts. They point to the lack of concrete evidence to support the existence of the Ark. However, Hancock and his supporters maintain that ancient texts, archaeological discoveries, and local legends provide compelling evidence for the Ark's historical reality.

#### **Paragraph 5:**

Hancock's quest for the Lost Ark of the Covenant remains a highly debated topic. While some dismiss it as a fictional pursuit, others believe that it has the potential to shed light on one of the most enduring mysteries of human history. The search for the sign and seal continues, and the outcome of Hancock's exploration could have profound implications for our understanding of the past and the nature of sacred objects.
