The Meraki can also do per-SSID and/or per-client bandwidth throttling, and has some rudimentary firewall capabilities for blocking site types.

**Why Cisco switches are so expensive?** They are expensive because you are basically paying for name, reputation, and skilled people to work on them. On top of that, they are pretty difficult for an average person to work with, we spend a lot of time and money on our Cisco certifications, so expect to pay up for us to service them too. Pretty much this.
