**2. What are the different types of standardized tests?** There are many different types of standardized tests, including:

- Achievement tests: Measure student knowledge and skills in specific subjects, such as reading, math, and science.
- Aptitude tests: Measure a student's potential for success in a particular field or area of study.

- Being biased against certain groups of students, such as students from low-income families or students with disabilities.
- Encouraging "teaching to the test" rather than focusing on genuine understanding.
- Contributing to stress and anxiety in students.

**5. What is the future of standardized testing?** The future of standardized testing is uncertain. While some experts believe that they will continue to be a valuable tool for assessing student achievement, others believe that they may be phased out in favor
