A: Steering is used to change the direction of a vehicle. It involves turning the steering wheel to the left or right, causing the front wheels of the vehicle to turn.

Q2: What are the three basic types of vehicle controls?

A: The three basic types of vehicle controls are steering, braking, and acceleration. Steering controls the direction of the vehicle, braking slows it down or stops it, and acceleration increases its speed.

Q3: How do you steer a vehicle smoothly and effectively?
